

## **SSC Subcommittee on Women's Health Issues in Thrombosis and Hemostasis**

- Name of project: Registry of pregnancy in patients exposed to direct oral anticoagulants (DOACs)
- Person responsible: Saskia Middeldorp and Peter Verhamme
- Project management: Suzanne Bleker and Marjolein Brekelmans
- Aim of the project: To register all women who have been pregnant while receiving anticoagulant treatment with a DOAC, and to assess the effects of exposure to DOACs in utero on the fetus and the child on the long-term.
- Methodology: Multicenter, international, observational cohort study. The registry will be designed to collect both retrospective and prospective data.
- Inclusion/recruitment criteria: All women with:
  - Confirmed use of DOACs, and
  - Confirmed pregnancy test during DOAC use
- Year of starting: 2015

If you want to add a patient to the registry, please contact Ingrid Bistervels ([i.m.bistervels@amc.uva.nl](mailto:i.m.bistervels@amc.uva.nl)) for detailed instructions.
