

Prepare for Montpellier! The ISTH SSC 2016 Meeting is on the Horizon

The 62nd Annual SSC Meeting of the ISTH takes place May 25-28 in Montpellier, France. Both engaging and insightful, [ISTH SSC 2016](#) is an excellent and affordable scientific event in the field of thrombosis and hemostasis.

With the meeting just two months away, it is time to start planing which sessions to attend.

Here are three of the top sessions you don't want to miss while at SSC 2016:

- **Biorheology:** Synthetic Platelets and Engineered Microparticles for Hemostasis and Drug Delivery
- **COA:** Guidelines for VTE Treatment
- **FVIII:** SIPPET Study: Results, Analysis and Debate Predictive Variables: Diagnosis of VTE in Particular MRI for Diagnosing Acute and Recurrent DVT

[View the full program online](#), and if you haven't already registered, [click here to get started](#).

Free Poster Printing

If you have an accepted abstract and need to print a poster, please take advantage of the free poster printing and delivery service provided by the ISTH in collaboration with [PosterSessionOnline](#). [Learn more here](#). As an added-value service, all presenters who submit via this platform may select to have their poster added to the [ISTH Academy](#) and Virtual Poster Gallery.

Networking and Cultural Evening on Thursday, May 26

Join the ISTH for a scientifically stimulating evening where you can experience the culture of the ISTH SSC 2016 host country, France, and mix, mingle, network and enjoy the tastes of the Languedoc-Roussillon region. [Learn more.](#)

The ISTH provides Advanced Training Courses throughout the world that offer the latest training in biological and clinical aspects of thrombosis and hemostasis. These three-day meetings allow 100-150 participants the opportunity to interact with the leading international scientists on a specific topic.

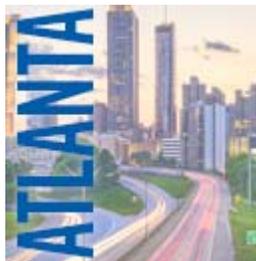

Register today to attend an ISTH Advanced Training Course in the following locations:

[Oxford, UK | September 6-9, 2016](#)

Location: St. Anne's College
Topics: Platelet disorders, genetics and platelet function testing

[Atlanta, USA | November 1-4, 2016](#)

Location: Emory University
Topics: Coagulation, bleeding disorders and venous thrombosis

Reach-the-World Spotlight: Nyan Lin Aung

The ISTH has awarded a **[Reach-the-World Fellowship](#)** to Nyan Lin Aung of Myanmar. Currently a pathologist at the National Health Laboratory in Yangon, Myanmar, Aung will serve an 11-week fellowship at the Katharine Dormandy Haemophilia Centre and Thrombosis Unit of the Royal Free Hospital in London, UK.

"I believe that the fellowship will provide me with so many needed skills and techniques in the diagnosis of these disorders," Aung said.

Aung hopes to share the new skills and techniques with his colleagues in his home country. "Working in a world-class laboratory and learning from the well-known thrombosis and hemostasis specialists at the Royal Free Hospital is an unbelievable opportunity for every clinician, especially for those from the developing countries," he said. "I can't wait to apply all the knowledge and experiences learned from this fellowship back in my country."

>> **[Learn more and apply for a Reach-the-World Fellowship by June 1](#)**

Participate in the SSC Survey on Hormonal Contraceptive Use After Acute VTE

Hormonal contraception is common among fertile women at the time of an acute venous thromboembolic event (VTE). Unfortunately, there is a clear lack of guidance regarding the need to modify hormonal contraception after VTE

World Thrombosis Day: Is Your Institution/Organization an Official Partner?

The ISTH's [World Thrombosis Day](#) (WTD) campaign is preparing exciting news, dynamic new resources and exceptional engagement opportunities for its third annual awareness day on October 13, 2016. To ensure that you, your institution/hospital and affiliated organizations/societies are well-informed about critical awareness-building activities around the world, [join the campaign now](#). This is the perfect way to engage with your patients and colleagues around the world while working closely to help save lives.

[Join us](#) to place a global spotlight on thrombosis as an urgent and growing health issue that must be addressed – not just on one day, but throughout the year! Thousands of events take place around the globe and online on WTD. Is your organization planning to participate?

Visit worldthrombosisday.org today or email wtd@isth.org to join the movement. Also, visit our social media pages on [Facebook](#), [Twitter](#), [Instagram](#), [LinkedIn](#) and [YouTube](#) using the hashtags: #WTD16 #KnowThrombosis

Connect with us!

March is ISTH membership referral month! Share the benefits of ISTH membership with your peers by referring them to become a member during the month of March.

As a special token of our appreciation, the ISTH will give away free ISTH bags (see right) to members who refer a friend or colleague during the month of March. This token of our appreciation will be sent to current members who refer others to join the ISTH as well as the newly referred members.

To get started, new members are asked to fill in the "referred by" space during the online registration process or indicate their referral otherwise. Only referred and referring members will receive a gift, so forward this email today!

Andreas Greinacher Awarded the Vox Sanguinis Best Paper Prize of 2015

ISTH Council member Andreas Greinacher was awarded the Jean Julliard Prize for the best paper published in *Vox Sanguinis*, the journal of the International Society of Blood Transfusion (ISBT).

The winning paper was: [HNA antibody-mediated neutrophil aggregation is dependent on serine protease activity.](#)

Congrats to Andreas and the other authors of the paper, including ISTH member Tamam Bakchoul.

Thrombosis Research Institute Requests Participation in Frontline2 Survey

The Fundamental Research in Oncology and Thrombosis (Frontline2) is a global survey, coordinated by the clinical research team at Thrombosis Research Institute (TRI), London.

The survey's aim is to bring together the views of oncologists, hematologists, surgeons, radiation oncologists and members of the palliative care team responsible for treating cancer-associated thrombosis (CAT). It will also describe the evolution of clinical understanding in this area since the first Frontline study in 2001, highlighting variations in care (nationally and internationally). Hopefully, the survey will also generate new insights into this important clinical problem, helping resolve unanswered questions and encouraging the development of further research.

>> [Learn more and take the Frontline2 survey](#)
