

# The Society

The ISTH first and foremost stands for leading edge science. As a global membership community of specialists in bleeding and clotting disorders, we are dedicated to transformative scientific discoveries to advance clinical practice and improve the lives of millions of people worldwide.

Our focus is the pursuit of greater understanding of the normal and abnormal clotting, bleeding processes and the development of treatments for related conditions. Many recent discoveries in thrombosis and hemostasis have been the result of research conducted by ISTH members. The Society has also been responsible for the development of nomenclature as well as scientific standards allowing for a common language and translation of basic science into clinical application.

# Membership Profile

ISTH has over 3,500 members in more than 84 countries around the world.

# About Us

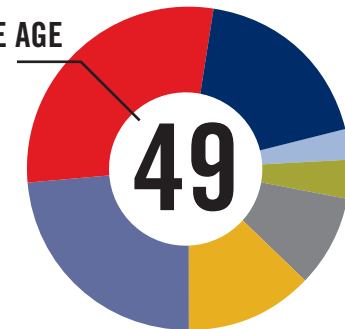

Clinicians • Researchers • Educators  
Trainees • Allied Health Professionals

This is an important time for researchers and clinicians concerned about clotting and bleeding disorders. Millions of people are affected by these disorders, and thrombotic events are a leading cause of death worldwide. While new therapies give patients many more options for treatment and disease management, there is still much to be discovered.

## Primary Specialties

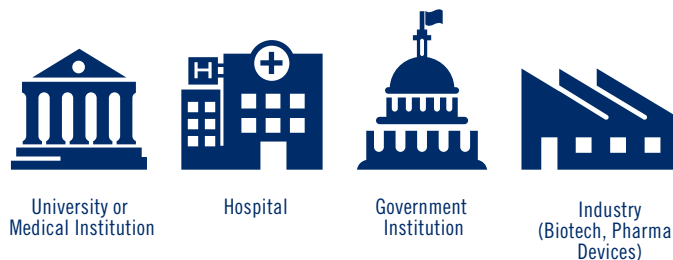

## AVERAGE AGE

- 29% CLINICAL RESEARCHERS
- 24% CLINICIANS
- 18% BASIC RESEARCHERS
- 13% EDUCATORS
- 9% TRAINEES/FELLOWS
- 4% NURSES & ALLIED HEALTH PROFESSIONALS
- 3% OTHER

## Most Common Place of Work

## Programs & Activities

- *Journal of Thrombosis and Haemostasis (JTH)*
- ISTH Biennial World Congresses
- ISTH SSC Annual Meetings
- E-learning Opportunities Year Round
- Networking and Career Development
- Educational and Training Courses
- Fellowships and Travel Grants
- Scientific Standardization and Nomenclature
- Professional Capacity Building in Developing Countries

## Membership

ISTH membership is an important investment in your own future at every stage in your career. With membership, you receive ISTH's highly cited publication, *Journal of Thrombosis and Haemostasis (JTH)*, timely information regarding thrombotic and bleeding disorders, targeted educational programs, networking opportunities and more! Why do thousands of clinicians, researchers, educators and allied health professionals choose to be part of ISTH? The truly international network and portfolio of activities, programs and benefits!

## Join Us

Member Type	Open To	Annual Dues
<b>Regular</b>	Clinicians, researchers and educators	<b>\$160</b>
<b>Associate</b>	Students, trainees and post-doctoral fellows below the age of 35	<b>\$35</b>
<b>Reach-the-World</b>	Clinicians, researchers and educators from developing countries	<b>\$35</b>
<b>Nurse</b>	Registered Nurses	<b>\$35</b>
<b>Allied Health Professional</b>	Laboratory and radiological technicians, occupational and physical therapists, and other health professions distinct from medicine and nursing	<b>\$35</b>

## International Society on Thrombosis and Haemostasis

In 1954, a small group of investigators used seed money from the National Heart, Lung and Blood Institute to form the International Committee on Thrombosis and Haemostasis (ICTH). Interest grew, and the ICTH began to consider expanding the scope of its mission.

In 1969, the ISTH was created at the 15th Annual Meeting of the International Committee on Thrombosis and Hemostasis (ICTH) to address the fields of blood coagulation and hemorrhagic disorders. Almost 200 enthusiastic scientists joined the Society that year, and some are still active members.

Today, the ISTH's impact and contributions to the understanding, prevention, diagnosis and treatment of thrombotic and bleeding disorders span six continents. Now the leading thrombosis and haemostasis related professional organization in the world, the ISTH is working to advance the understanding, prevention, diagnosis and treatment of thrombotic and bleeding disorders.

As part of our activities, we initiate and promote education and outreach initiatives, research activities, scientific meetings, peer-reviewed publications, expert committees and the development of standards allowing a common language and approach to basic and clinical science all over the world.
