Content Usage

Unless otherwise indicated, all information contained on this website such as text, graphics, logos and images is copyrighted by and proprietary to the International Society on Thrombosis and Haemostasis (ISTH) and may not be reproduced in whole or in part by persons, organizations, or corporations other than the ISTH, without prior written permission of the Society.

How To Request Permission

To obtain permission to use or copy ISTH copyrighted materials from the ISTH’s website or from ISTH printed materials, videos or audio materials, you must submit your request in writing to Louise St. Germain at Louise_StGermain@isth.org.

Requests must include:

- Requestor’s name; company/institution name; address; telephone number; fax number and/or e-mail address; title; copyright date; page number or website URL address; and the exact material to be use.
- The request must state exactly how the material will be used and distributed and if the materials will be sold.
- Note: Incomplete requests will be returned. International requests must include an e-mail address.

How long will it take to process my request?

Please allow 10 business days from receipt of all required information for a response. Additional time is required for requests to translate materials.

General Guidelines

Permission may be granted to copy ISTH material if the request meets these criteria:

- Material is being reproduced for educational purposes.
- Material will not be used for a commercial or for-profit activity or to promote a commercial product.
- The ISTH copyright statement must be included on the reproduction.
Permission will not be granted to:

- Use AHA materials to endorse (implied or otherwise) a product, company or service.
- Copy an entire publication, pamphlet, slide set or video. (Permission to publish, license or reproduce all or substantially all of an ISTH copyrighted work will not be granted by the Legal Department through the copyright process but instead will be referred to the appropriate source.)
- Use any material that has been discontinued or is under revision.
- Modify or adapt ISTH materials, unless predetermined.
