

2019 - 2020 Water & Wastewater Workshops

CHLORINE SAFETY

5 hours of water and wastewater credit available

All personnel who are directly involved in the operation and maintenance of chlorination systems need to be properly trained. Water and wastewater system operators and others who are involved or are interested in learning more about chlorine safety are encouraged to attend.

SURFACE WATER TREATMENT

5 hours of water operator credit available

Source water considerations and surface water treatment processes will be discussed in this workshop, along with important compliance rules and regulations. An overview of the Surface Water Treatment Rule will be given, including compliance, CT calculations, sample site plans and sample collections.

The discussion of Stage 2 DBP Rule will also focus on compliance, purchase systems, water age management, infrastructure considerations and O&M maintenance.

DISTRIBUTION SYSTEM RULES

5 hours of water operator credit available

This training will include LCR & RTCR overviews, updates, and compliance, including: site sample plans, sample locations, material evaluations, and certification of deliveries. CT positives will be discussed, understanding real detects versus sampling issues. There is also a hands-on sampling lab component to this workshop, giving attendees an understanding of proper procedures and technique demonstrations, followed by actual attendee sample collection. Other areas of instruction will include Data Collector, Level 1 Assessments, repeat samples, and the Groundwater Rule.

GROUNDWATER WELLS: O&M

5 hours of water operator credit available

It's important to understand the basics of groundwater, types of aquifers and their susceptibility to contamination. This information will help attendees understand the proper design, operation and maintenance of groundwater wells. Well maintenance, recordkeeping, troubleshooting and well rehabilitation, as well as sampling and testing will be thoroughly discussed at this training.

Funding for these trainings are provided through a contractual agreement between the Kansas Department of Health & Environment, PWS Capacity Development Program, State Revolving Fund Set-aside and Kansas Municipal Utilities.

2019-20 WORKSHOP DATES & LOCATIONS

- July 25, 2019 | McPherson - Distribution System Rules - KMU Training Center, 2090 E. Avenue A, McPherson, KS
- July 26, 2019 | McPherson - Chlorine Safety - KMU Training Center, 2090 E. Avenue A, McPherson, KS
- August 20, 2019 | Larned - Groundwater Wells: O&M - Chamber of Commerce, Jordaam Room, 502 Broadway St, Larned, KS
- October 7, 2019 | Atchison - Distribution System Rules - Atchison Event Center, 710 S 9th St., Atchison, KS
- October 8, 2019 | Osage City - Surface Water Treatment - Osage City Community Bldg., 517 South 1st St, Osage City, KS
