When operating a slicer:

- Never operate a slicer without proper guards.
- Slicer should be equipped with a three-prong grounding plug and connected to a properly grounded outlet.
- Do not operate a slicer or any power equipment with wet hands.
- Turn the slicer off when adjusting the blade depth or changing product.
- When not in use, the blade depth gauge should always be set to “Zero”.

When cleaning a slicer:

- Disconnect the slicer from all power sources.
- Turn the blade depth gauge to “Zero”.
- Use protective gloves and a handled brush or sponge to clean the blade from the center wiping outward.
- Replace all guards according to the manufacturer’s instructions.
- Check all parts for proper working condition before using and immediately report any worn, damaged or broken parts.
