

# Zurn Sensor Faucet Review

This presentation will provide a brief overview of Zurn sensor products

# Faucet Overview

<u>Non-Connected</u>	<u>Connected</u>	<u>Style</u>
• Z6913-XL (Old style gray plug)	Z6913-XL* W2 (Gen 3 sensor)	Front looking sensor, single post
• Z6915-XL (Old style gray plug)	Z6915-XL* W2 (Gen 3 sensor)	Front looking sensor, 4" center set
• Z6920-XL (Old style gray plug)	Z6920-XL* W2 (Gen 3 sensor)	Front looking sensor, single post, gooseneck spout
• Z6922-XL (Old style gray plug)	Z6922-XL* W2 (Gen 3 sensor)	Front looking sensor, wall mount, gooseneck spout
•		
• Z6933-XL	N/A	Front looking sensor, single post
• Z6936-XL	N/A	Front looking sensor, single post
•		
• Z6950-XL-S	Z6950-XL-S* W2	Down looking sensor, single post
• Z6950-XL-S-IM	Z6950-XL-S-IM* W2	Down looking sensor, single post, integrated mixing
valve		
• Z6955-XL-S	Z6955-XL-S* W2	Down looking sensor, 4" center set
•		
• Z6953-XL	Z6953-XL* W2	Forward looking sensor, single post
• Z6956-XL	Z6956-XL* W2	Forward looking sensor, single post
•		
• Z6957-XL	N/A	Down looking sensor, wall mount

# Types of Sensor Faucets

- The sensor faucets have been consolidated into two types: **Connected** and **Non-Connected**. For the most part they are the same faucets but there are a couple of exceptions.
- With the connected faucets there are battery and hardwired power options. We are attempting to discontinue the hardwired option and just utilize the battery powered end-points. The battery end-points will support both power options of the faucet.

# Non-Connected Product

- The Standard Z 6913 XL is a good example
- It features
  - Infrared proximity sensor
  - Heavy-duty cast brass body
  - Battery, plug-in, hardwired, or hydropower
  - 3-year warranty
  - Water saving automatic sensor promotes water conservation and sanitation
  - Retrofit suitable for retrofit applications
  - 30-second timeout feature reduces water waste saving money
  - Battery-powered faucet uses 4 standard AA batteries
  - convergence-type proximity sensor precisely

# Connected Product

- Wirelessly monitor restroom performance to improve restroom uptime and cleanliness
- Customizable alert parameters for usage, water consumption, and preventative maintenance
- Handwashing score tracks flush-to-wash ratio to monitor the effective hygiene programs
- View dashboard-style device alerts, performance data, and trends via a secure web portal with 24/7 access
- Battery power allows quick and easy installation
- Water-efficient, low flow aerator options, and a 30-second timeout feature saves water and money
- Infrared convergence-type proximity sensor precisely detects users reducing water waste
- Lead-free cast brass body with a chrome-plated finish provides durability while complying with the Safe Water Drinking Act
- Battery-powered endpoint, 4 "AA" long-life, lithium batteries included, and standard

# Range of Connected Products

- Connected products include
  - faucets
  - flush valves
  - retrofit products
  - backflows
- This gives building management complete control of water usage.

# Ensuring Proper performance

- By following proper instillation practices, most problems can be avoided
- Zurn offers several avenues of resources to ensure this
- This will ensure years of uninterrupted service of the product
- Happy repeat customers is always the ultimate goal

PROLUX®  
Z6950-XL-S-E

# Trouble Shooting

- As with all products there will be the occasional need to trouble shoot
  - Zurn offers a wealth of resources to handle any situations
  - Instillation Guides
  - Spec Sheets
  - Videos
  - Direct assistance
- 
- All of these troubleshooting resources can be found on the Zurn website or in the packaging.
