

SAFETY SCREENING SOLUTIONS

Customizable, contactless IR temperature screening products to protect workplace employees and visitors.

SecureCheck-N

[Learn More >](#)

Our IR temperature reader and kiosk system is an out of the box IR fever detection scanner that attaches to any tablet. Our companion software app can be configured to include a release of liability form, health screening questionnaire and can initiate the check-in/registration by easy integration with your guest registration system.

- Measures 2-3 ft, ~1 second per scan
- Easy screening and instant notification
- Can be integrated with reservation systems or POS terminals
- Bespoke, white-labelled companion app available
- Attach to any tablet

SecurePass Smart Pro

[Learn More >](#)

Our SecurePass Smart Pro is an all-in-one solution, equipped with an IR body temperature detector and a 2MP facial recognition camera to deliver body temperature readout and identity check. The system includes a background management app with large capacity storage, dynamic face recognition and multiple recognition functions.

- Measures 2-3 ft, ~1 second per scan
- Facial recognition, RFID, multiple integration options
- Easy integration into current access control system
- Android-Based

SecureCam T2S

[Learn More >](#)

SecureCam T2S is a walk-through temperature measurement device that is able to scan a crowd quickly and instantaneously. It can measure groups of people as they walk by making it a convenient and efficient way to protect staff and visitors. The camera can be installed at an exit or entry, connects remotely to a monitor with real-time detection and automated warning signal.

- Measures up to 10 ft, multi-person
- Safe, effective prescreening on entry
- AVM NVR software, can be integrated with your existing security cameras systems
- Hundreds of scans can happen in minutes
- Optional wall, pole or tripod mounting
