OVERVIEW:
With the recent heightened activity in the area of telemedicine, is your hospital compliant with the regulatory standards? The Centers for Medicare and Medicaid Services (CMS) has conditions of participation (CoP) interpretive guidelines for all hospitals regarding their telemedicine standards. The regulations cover the revised credentialing and privileging process for practitioners who provide telemedicine services. The new process is less burdensome and allows hospitals to provide credentialing by proxy.

CMS has been issuing quarterly reports on the number of hospital deficiencies. This webinar will discuss the most problematic standards in the telemedicine interpretive guidelines, including what provisions should be in the telemedicine contract and the new tag numbers for critical access hospitals in 2020. Come learn about regulations, interpretive guidelines and the responsibilities of the board, medical staff and hospital administration to ensure compliance.

OBJECTIVES:
At the conclusion of this session, participants will be able to:
• Discuss that there are both regulations and CMS interpretive guidelines that are now part of the hospital CoPs on telemedicine credentialing;
• Recall that CMS includes a mechanism for all hospitals to use proxy credentialing with a Medicare-certified hospitals or other telemedicine entities; and
• Describe that the hospital must have a written agreement that specifies the responsibilities of the distant-site hospital to meet the required credentialing requirements.
