

Greensburg is home to the most LEED (Leadership in Energy and Environmental Design) buildings per capita in the U.S.

Greensburg is the first city in the U.S. to use all LED streetlights.

Water is a very precious resource and Greensburg residents conserve every drop with low flow fixtures and native plantings in their landscaping. Rainwater is collected for use in irrigation and in some facilities, as grey water in toilets.

Greensburg has single stream curbside recycling.

Greensburg is 100% renewable, 100% of the time. All of the electricity used in the City of Greensburg is wind energy.

Visit www.greensburgks.org for more information on sustainability practices and the rebuilding effort.
