GOAL: CIVIC SKILLS
Here's some topic ideas! How do your students participate in these local government policy areas?

- Political Systems
- Human Geography
- Policymakers
- Civil Rights
- Environment
- Human Services
- Healthcare
- Infrastructure
- Taxation

CONNECT
Increase your students' knowledge of these topic areas from a local government perspective. For example: Have your students read how a bill becomes a law. Use bills such as HB 2106 Sales Tax on Groceries to follow the process from the committee that debates it, to the summary on the bill, to its next steps to become law.

DISCUSS
Q. Who are your local elected officials and what role do they play in passing policy on these topics?
Q. What are the State committees and how do they appropriate funding?
Q. If a “Budget is a statement of priorities,” pull up your city’s budget and discuss your city’s priorities.

ACTIVITY
Have your students form a committee and debate a bill, include a debate on funding and exemptions! Record the debate or take a picture of the activity and post it to the League's Instagram. Introduce us to our up and coming policy entrepreneurs!
