

Job Title: Wetland Scientist

Salary/Compensation: \$80-120k

Location of position (City/town): hybrid work model, New England

Employer: Horsley Witten Group

General Job description:

Horsley Witten Group is seeking a full-time Environmental Scientist to join our team of enthusiastic professionals to provide wetlands and permitting support for a wide range of technical projects for our New England public and private sector clients. The ideal candidate will thrive working on varied and diverse projects and share in our corporate Mission, Vision and Values.

Qualifications:

- A minimum B.S. in wetland science, biology, plant/soil science, wildlife biology, ecology, or other related environmental science
- Between three to five years of direct field experience in inland and coastal resource area delineation and wildlife habitat surveys and related state (e.g., MA, MEPA, Ch. 91, WQC; RI, NH) and federal wetlands permitting experience
- Have a valid driver's license, access to an automobile, and willingness to travel out-of-state from time to time

Deadline to apply (if any): n/a
