Environmental Analyst

The Littleton Electric Light & Water Department (LELWD) is seeking applications for a part-time Environmental Analyst to assist with water quality monitoring, regulatory reporting, and coordination of water quality protection and restoration projects with the Littleton Clean Lakes Committee. This position will work under the Water Quality Manager and will be limited to less than 20 hours per week. Rate of pay is $30 per hour.

Responsibilities will include:

- Water Resource Monitoring – Conduct routine water quality sampling and water level monitoring field work at approximately 50 groundwater monitoring wells and 15 surface water sites located throughout the Town of Littleton.
- Watershed Restoration – Assist with implementation of the Stony Brook Streamflow Restoration Plan, Mill Pond Aquatic Ecosystem Restoration Project, and ongoing aquatic invasive species management.
- Geographic Information Systems – Develop and maintain a comprehensive spatial database of groundwater and surface water resource data from current and historical data.
- Regulatory Reporting – Complete and submit required monthly and yearly water quality reports to MassDEP and US EPA.
- Outreach & Communications – Develop fact sheets, newsletters, webpages, and other materials to communicate the importance of various water resource management issues in Littleton. Present educational programming to school groups and the general public to further Littleton residents’ understanding and involvement in water resource protection activities.

The position requires a B.S. in Environmental Science or a related discipline, experience in a related field, and a valid Class D Massachusetts Driver’s license. The ability to regularly attend night meetings (1-2 per month) is essential to successfully performing the duties of this position.

Please apply to Corey Godfrey, Water Quality Manager, Littleton Water Department, 39 Ayer Road, Littleton, MA 01460 or by email at cgodfrey@lelw.com.

Applications accepted until May 22, 2020.
