

Job Title: Project Manager

Salary/Compensation: Negotiable

Location of position: Quincy, MA

Employer: Stantec

Description of employer

Stantec's Environmental Services group is dedicated to managing environmental issues professionally and proactively. We provide integrated, multidisciplinary services to identify and assess liabilities and risks, and to develop solutions to site management, remediation, and mitigation. Our staff of professionals includes specialists in ecology, fisheries biology, forestry, habitat and ecosystem restoration, environmental monitoring and risk assessment, hydrogeology, permitting and compliance, soil science, state and federal permitting, regulatory negotiation, stormwater permitting and planning, and wetland science.

Work schedule: Full time

General Job description:

Seeking a Project Manager with 10 years' experience to provide technical expertise for a variety of public and private projects across various in-house disciplines throughout New England and manage information development, inland and coastal wetland delineations, threatened and endangered species habitat characterizations, land use mapping and vegetation cover classification, GPS data collection, consultations, permitting, and report preparations for the US Army Corps of Engineers, and MassDEP Division of Wetlands and Waterways, Bureau of Water Resources.

Qualifications:

Your Capabilities and Credentials

- Bachelors, Masters or Law degree in Environmental Science, or related field.
- Professional Wetland Scientist with direct (self-performing) experience flagging inland and coastal resource areas;
- Certified Professional Soil Scientist preferred;
- Minimum of 10 years of experience of independent wetland delineations and regulatory practice;
- Knowledge of and ability to apply regulatory associations, including the US Environmental Protection Agency (EPA), USACE, and MassDEP
- Knowledge of documents related to requests for proposals, invitations for bid, and tendering offers
