

## **Mike Meiser, Woolpert**

As a Program Director for Woolpert's Government Solutions Market, Michael Meiser directs the management of many of Woolpert's federal lidar task orders. Michael employs effective project management strategies and acts as a liaison between Woolpert clients, project management, and operations to ensure a high level of customer satisfaction.

With nearly fifteen years of experience working with lidar and remote sensing, Michael has led Woolpert's production staff in producing several hundred thousand square miles of geospatial data products and services. He has substantial technical expertise in the acquisition, processing, and management of lidar imagery, and remote sensing projects. Additionally, Michael is an ASPRS Certified Lidar Mapping Scientist (CMS-Lidar) and Project Management Professional (PMP).

As a leader in the industry, Mr. Meiser is on the MAPPS board of directors. Mike has presented to state and local governments as well as private organizations. Additionally, he has presented at several industry related conferences including multiple presentations at the International Lidar Mapping Forum (ILMF), The United States Geological Survey (USGS), and The National Oceanic and Atmospheric Administration (NOAA).
