

NSGIC/MAPPS JOINT CONFERENCE
MAPPS MEETING NOTES
March 9-10, 2010

Paul Rooney DHS

DHS remote sensing RFI

Analyzed responses

Element by element – what are imagery requirements?

RFP in contracts should be out in next 15

Release 1st quarter/around 3rd quarters - QBS

Paul – unknown how many RFI responses

Risk Map

RFI within 1-2 months

Hydrologic people initially define need

Contracting needs – between now and June

1) Inventory existing data

2) Guidance on task order and changing money, setting priorities

3) Developing specifics of RFP

4) Rolling it out

Currently 3 existing contracts

Nancy Blyler - USACE

Next year for photogrammetric manual update. MAPPS has offered, and continues to offer our help.

Q : What about introducing new technologies (IFSAR) for Risk Map?

A: Interagency Council for Remote Sensing. Coordinating council (IRSCC)

Supposed to be technical experts on coordination and would be looked to for guidance on this.

Q: Report to Congress – can MAPPS review?

A: No. Fed/State collaboration – it is in review now

Nancy – ARRA project map updated on web site. Big push in April for funding.

Levee inspection money going out

List of projects by April or money to be pulled back – per Nancy and HQ

All ARRA money spent by 2010

Everything to be contracted by 2nd/3rd quarter

QBS training – discussion that there is a need within the USACE with new contracting people.

5 day A&E contracting workshop

MAPPS members can join (as space is available)

Brainstorm a new course on estimating geospatial (J Palatiello)

FOCUS on developing photogrammetry manual with new technologies and estimating as goal.
