WELCOME
MSHP Purpose and Goals

The Massachusetts Society of Health-System Pharmacists (MSHP) was founded in 1945 to foster the professional growth of hospital pharmacy in Massachusetts. In the 1960’s, MSHP became affiliated with the American Society of Hospital Pharmacists (ASHP) now known as the American Society of Health-System Pharmacists.

In 1997, we changed our name and developed a new mission statement reflecting pharmacy as a part of an integrated health-system. Today, MSHP represents over 1,900 pharmacists and pharmacy technicians working in organized health-systems throughout the Commonwealth. For over fifty years, the members of MSHP have worked together in the achievement of common professional goals.

These goals include the following: advancement of rational drug therapy in organized healthcare settings through the provision of pharmaceutical care; advancement and encouragement of professional excellence by providing leadership, direction, education and communication among its members practicing in healthcare systems; fostering of closer relationships between health-system pharmacy, other pharmaceutical disciplines and health care providers.
