

Michigan Bioscience INNOVATION IS IN STYLE

Ours is an industry driven to innovate, powered by collaboration, and focused on feeding, fueling, and curing the world. To do that, you need resources, connections, and a voice. WE CAN HELP.

EDUCATE

We use our connections to our extensive personal and member networks, national and news organizations, and legislators to gather and disseminate information critical to your success through news sharing, webinars, events, and emails designed to keep you in-the-know.

ADVOCATE

You don't have the time or resources to visit the state or federal legislature every time a bill is proposed that would impact your business--that's why we go for you. We educate our politicians about the industry and partner with other state and national organizations to ensure industry representation.

EMPOWER

Your business is only as strong as the resources that support it. Whether you need business services like legal aid or marketing support, or a purchasing program that can save money and impact your bottom line, we have solutions to empower you and your organization.

INSPIRE

Collaboration with peers and connection to an industry that is driven to improve quality of life is key to maintaining motivation. We share stories, promote ideas, and host events that give you opportunities to feel connected. We can help keep you inspired, so you can change the world.
