

Become Certified in Government Technology Leadership

ENROLL NOW

for 2018-19 classes!

**FIRST COME FIRST SERVED
SEATING IS LIMITED**

This nationally-recognized program equips government technology professionals with the requisite tools to improve and demonstrate your leadership skills to best manage your organization.

Because career paths can rapidly change, PTI has expanded the program to allow graduates to be designated as either a:

Certified Government CIO; or

**Certified in Government
Technology Leadership**

During the course of this twelve-month program (total of 240 contact hours to include three on-site classes, nine virtual class discussions, online coursework) we will address:

- Leadership styles
- Communicating for results
- Managing change
- Assessing organizational effectiveness

Do I Have to be a CIO to Enroll?

No. Approximately one-third of the students who participate in each class are current CIOs, two-thirds of the students are not—they are typically Deputy CIOs or mid to high level IT professionals.

2018 program includes:

- **The East Coast Program**
begins Thursday, May 17, 2018
in New Brunswick, NJ
- **The West Coast Program**
begins Thursday, June 14, 2018
in Los Angeles, CA
- **A “Dual-track” program where students in the two courses will come together for nine virtual class discussions**
- **Each course will accept up to three representatives from the technology vendor community**
(non-sales related positions)

Your Experience Makes this Program Stronger!

What sets this program apart from the typical continuing education program? One of the unique aspects of this PTI program is that the instructors treat the class as a *cohort group* of individuals who are willing and eager to share their experiences and insight with each other. The program instructors **encourage** and the students **value** the conversation and dialog that takes place during the Live and monthly Virtual classes.

Live and Virtual Class Topics Covered Throughout this Year-long Program

The Future CIO Leader

- Review of CGCIO program and coursework
- Class scan of the current IT leadership environment
