Management of Motor & Non-Motor Symptoms in Advanced Parkinson’s Disease

LEARNING OBJECTIVES:
This program prepares providers to:
• Identify three cardinal features of Parkinson’s disease.
• Identify psychiatric issues as Parkinson’s disease advances, including hallucinations, psychotic behaviors, and delusions; understand the prevalence of these issues in advanced Parkinson’s disease; learn management strategies for psychiatric issues in Parkinson’s disease.
• Identify cognitive changes and dementia in Parkinson’s disease; understand the prevalence of dementia in advanced Parkinson’s disease; learn management strategies for Parkinson’s disease dementia.
• Identify sleep disorders in Parkinson’s disease including sleep fragmentation, excessive daytime sleepiness, REM sleep behavior disorder, and restless leg syndrome at sleep onset, and learn management strategies for sleep disorders in Parkinson’s disease.

Speaker:
Dr. Jane Achenbach, Cambridge Medical Center, Allina Health

Program Description/Purpose:
This presentation is designed to increase providers’ knowledge of motor and non-motor symptoms in advanced Parkinson’s disease, as well as how to manage these complex symptoms. The specific non-motor symptoms that will be discussed include cognitive changes and dementia, psychiatric issues, and sleep disorders.

Target Audience:
Physicians, nurses, pharmacists and all health care providers/long-term care professionals who work with the Parkinson’s population.

Date: Wednesday, June 19, 2019
Time: 5:30 p.m.
Location: Mercy Hospital
4050 Coon Rapids Blvd. NW
Coon Rapids, MN 55433
Auditorium – Lower Level

Cost: There is no cost to attend this program. A light meal will be served.
