I have been the Executive Director of the Consortium of Multiple Sclerosis Centers (CMSC) since 1992, and a member of the CMSC since its founding. It is with great pride that I am able to report that our San Antonio meeting was the most successful and best attended in our history. Our topics ranged from basic information about clinical care to complex research. Our attendees came from across the globe and despite the wonderful setting vying for their attention, our classrooms were filled with enthusiastic healthcare professionals.

We could not have done this without you, our membership, and without the support and guidance of our magnificent Board of Governors. I particularly want to thank our Past President, Colleen Harris, whose wisdom and patience have shepherded us through an exciting 2 years. Congratulations to Dr. Michael Kaufman, our new President, and to all our Board members who make an important impact day after day in their professional settings and who volunteer their time to the CMSC.

The CMSC is proud of the collaborative spirit that drives us toward our mission of being the preeminent organization of multiple sclerosis (MS) professionals. Congratulations to us all on our achievements.

June Halper, APN-C, MSCN, FAAN, Executive Director, CMSC/IOMSN
Dear Colleagues,

I am looking forward to the challenges and opportunities that we will face during my 2-year term in office. We will be dealing with more regulations upon our practices and pharmaceutical partners, less government funding per patient, a higher patient volume, and more paperwork. The next 2 years will not be easy, but that doesn’t mean that they cannot be fun or that we cannot help to shape them. Our individual centers will need to be more creative to move forward. We will be challenged to find professional satisfaction while providing the best possible care for our patients and while working for a deeper understanding of multiple sclerosis (MS).

In uncertain times, the Consortium of Multiple Sclerosis Centers (CMSC) is increasingly relevant to practitioners of all disciplines and will be in greater need of our support. If you are not familiar with the comprehensive nature of the CMSC, you might be surprised to know that it sponsors the largest database of MS patients available (the Global Patient Registry—formerly called NARCOMS); is now an accredited continuing medical education (CME) provider; attracts over 1,400 attendees from more than 30 countries to its Annual Meeting; sponsors research and training grants, conducts consensus conferences; and advocates for MS care providers.

The vision-setting body of the CMSC, the Board of Governors, is composed entirely of volunteers who need your engagement. I feel confident that the CMSC can accommodate those who wish to have a significant voice in the future of (Continued on page 3)
The Consortium of Multiple Sclerosis Centers (CMSC) and the Foundation of the CMSC (FCMSC) have collaborated once again on two important new initiatives designed to continue the mission of building the future of MS care through the support of future research. Despite a very tight financial environment, the Foundation has secured funding for two new awards.

**John F. Kurtzke Pilot Research Fellowship**

Funds have been received from Questcor Pharmaceuticals to support an additional CMSC Pilot Research Award. This award will be named in honor of John F. Kurtzke, MD, FAAN, whose landmark achievements in establishing measures for disability progression have been utilized in most recent MS clinical research trials.

**CMSC/FCMSC San Antonio Host City Scholarship**

The CMSC and its Foundation are pleased to announce the inaugural annual CMSC/FCMSC Host City Medical Student Scholarship, supported in 2010 by a grant from Genzyme Corporation. This new scholarship is designed to encourage and support the continuing education of a promising medical student studying in the host city in which CMSC’s Annual Meeting is held, allowing him or her to learn from today’s dedicated and experienced healthcare professionals and teaching faculty, and to develop his or her clinical skills.

(Continued from page 2)

MS care. Qualifications for participation are the ability to work hard, the willingness to be a team player, and a joyful adherence to the goals of the CMSC (which depend upon and need your input). Our membership has the opportunity to become involved in advocacy, publications and authorships, scientific and clinical investigations, educational programs, clinical care guidelines, fundraising, and vision-setting, and to work with specific committees as they arise.

Please contact the CMSC to volunteer, or you can email me directly at Michael.Kaufman@carolinashc.org, and I’ll see that your interest is conveyed to the proper person.

Please also log onto the CMSC website at www.mscar.org and, if possible, submit an article to our publication, the *International Journal of MS Care*. We hope to have this journal indexed in the near future.

A great deal remains to be done as we continue building the future of MS care, and I invite you to actively work towards this goal through the CMSC.

Michael Kaufman, MD, President, CMSC, Michael.Kaufman@carolinashc.org

---

**CMSC BREAKING NEWS**

The Consortium of Multiple Sclerosis Centers was notified in July by the Accreditation Council for Continuing Medical Education (ACCME) that the CMSC has fulfilled all requirements and is hereby accredited as a provider of continuing medical education (CME) for physicians.

---

(Continued on page 10)
One of the most esteemed of our Consortium of Multiple Sclerosis Centers (CMSC) colleagues, Kenneth Johnson, MD, was presented with the Lifetime Achievement Award at the 24th Annual Meeting in San Antonio, Texas. Dr. Johnson founded the America’s Committee for Treatment and Research in Multiple Sclerosis (ACTRIMS), which has become a leading North American organization for advancing multiple sclerosis (MS) science and patient care.

Dr. Johnson has been active both as a CMSC Board Member and NARCOMS (MS patient database) Advisory Board member, lending his particular expertise in virology and immunology to furthering the knowledge of the CMSC.

**Whitaker Prize for MS Research:** Robert Axtell, B. DeJong, K. Boniface, r. de Waal Malefyt, C. Raman, L. Steinman, Stanford School of Medicine, Palo Alto, CA

*For work presented in the poster:* TH1 and TH17 Pathways Determine Opposite Results of Interferon Beta Treatment of Experimental Autoimmune Encephalomyelitis and Relapsing-Remitting Multiple Sclerosis

The Whitaker Prize is presented to a young and emerging scientist whose work is judged to have a substantial promise to increase the understanding of the pathophysiology, immunology, genetics, and/or epidemiology of multiple sclerosis (MS). The Whitaker Prize is presented in memory of John Whitaker, MD, a pioneer and role model in MS research. It is funded by the Foundation of the CMSC through support from EMD Serono.

**Patient and Family Education Award for Best Poster:** KM Oddis, G. Mitchell, R. Heyman, D. Punjack, M. O’Leary, University of Pittsburgh, PA

*For the poster:* Transitioning a Patient from Research to Clinical Care: A Model for Handoff for Multiple Sclerosis Trial Centers

The Patient and Family Education Award for Best Poster is presented each year for the best poster presentation depicting excellence in patient and family education. This award is judged by a panel of CMSC members representing various disciplines caring for persons with MS.

(Continued on page 11)
Welcome From the New IOMSN President, Marie Namey

At the 2010 Nurses Dinner at the Consortium of MS Centers (CMSC), I was pleased to step up as the President of the International Organization of MS Nurses (IOMSN). These next 2 years will be an exciting and eventful time for me and for the IOMSN as well.

This year marks the beginning of a new decade for us. Amy Perrin Ross did a great job helping to grow our organization over the past 2 years, particularly outside the United States, and I am thrilled that our membership now exceeds 1,800 nurses, with representation across five continents. We’re looking forward to expanding our outreach programs, maintaining the high quality of our educational programs, and continuing our strong presence at the CMSC Annual Meeting. I also hope to personally bring my experiences working with patient advocacy programs to the IOMSN.

Certainly there is strength in numbers, but we know there is power in one. Each one of us can have an effect on people with MS and their families through advocacy and education. I am hoping that each one of our members becomes more involved with this organization as the IOMSN continues thriving and growing. We welcome new ideas and suggestions for programs and services as we endeavor to reflect the needs of our membership as well as of our patients, their families, and our professional colleagues.

The MS EXCHANGE continues to be a very popular newsletter for MS nurses. Use this forum to highlight your nursing activities and research, and let us know what important information you want to share with others on the IOMSN Update pages.

I look forward to an important year for the IOMSN and its members as we tackle new challenges in the changing healthcare environment, and I hope we continue to support each other in building the future of MS care, as we have done so successfully in the past.

Marie Namey, RN, MSN, President, IOMSN

Teva Neuroscience is dedicated to the MS nurse community and has supported scholarships for nurses, educational programs such as monographs, CE programs, IOMSN dinners, the MS Exchange, and MS Nurse Counseling Points™ (which now offers complimentary CEUs).

Teva Neuroscience is also proud to say that all of its Shared Solutions Nurses are certified in MS Nursing.
IOMSN UPDATE

Annual Awards
Presented at IOMSN Dinner

The IOMSN Dinner is special each year for many reasons. It’s well known to be a high-energy evening of fun and dancing, and a great opportunity to interact with other MS nurses and share experiences. “It’s a night that most of us look forward to,” says former IOMSN President Kathleen Costello. “For many years, it’s been the hottest ticket to get for the meeting.” One of the big events at the dinner is the presentation of awards to members who have demonstrated the highest levels of commitment to the field of MS care. This year, more awards than ever before were given out.

IOMSN Thumbs Up Award
The Thumbs Up Award is presented to a person(s) who has been instrumental in advocating for and promoting MS nursing. Two Thumbs Up Awards were presented in 2010: the first to Sallyann Henry, PhD, President, Professional Testing Corporation (New York, NY), and the second to Francine Tremblay, RN, retired (Montreal, Quebec, CA).

IOMSN Linda Morgante Hope Award
The IOMSN Linda Morgante Hope Award is presented each year for the poster that best represents a spirit of optimism and possibility related to clinical care or education for patients with MS and their families. In 2010 the award was presented to DL Hart, Ruth I. Memoli, CSW, and Brian Mason, PT, DPT, for their poster, Developing a Wellness Program for People with Multiple Sclerosis: Description and Initial Results.

June Halper Award
The June Halper Award for Excellence in MS Nursing is presented for leadership and creativity in the care of people with MS and their families. The award signifies energy of purpose to provide or promote the most up-to-date, comprehensive care possible. In 2010, two awards were presented: one to Dorothea Cassidy Pfohl, RN, BS, MSCN, of the University of Pennsylvania Health Sciences Comprehensive MS Center (Philadelphia, PA), and the other to Lina Corrievou, RN, MSCN, CHRDL, of the MS Clinic (Montreal, Quebec, CA).

IOMSN Research Award
The IOMSN Research Award was presented to Elsie Gulick, PhD, RN, FAAN.

Each year, the International Organization of Multiple Sclerosis Nurses (IOMSN) presents a half-day Advanced Practice Nursing workshop at the Consortium of Multiple Sclerosis Centers (CMSC) Annual Meeting. Kathleen Costello, MS, ANP-BC, MSCN, MSCS, Nurse Practitioner at Johns Hopkins MS Center in Baltimore, MD and a past President of the IOMSN has been the coordinator of the program for the past several years.

The topic for the 2010 workshop was Research in Clinical Practice. “This year’s topic came out of an unmet need of the nursing and advanced practice nursing community,” explains Ms. Costello. Based on surveys from previous years, it became clear that many nurses were interested in learning about the research process, and this first year conducting the session drew a full audience of about 50 attendees.

The program agenda was designed to offer the basic information necessary to consider conducting a research trial. Ms. Costello opened the session with an overview of issues in clinical research:

- how research fits into the model of evidence-based practice;
- what nursing research is;
- how one comes up with a topic (i.e., how to develop a research question); and
- how to conduct a search of the nursing and medical literature.

Heidi Maloni, PhD, ANP-BC, CNRN, MSCN, National Clinical Nursing Director in the Department of Neurology at the VA Medical Center in Washington, DC, addressed the details of study design, statistical analysis, and writing grant applications.

The final speaker, Mary Filipi, PhD, RN, FNP-C, a researcher at the University of Nebraska Medical Center-MS Center, Omaha, talked about the purpose and function of the Institutional Review Board (IRB), how to submit a research proposal, and how to assemble a peer review group to assist in reviewing your application. “This is important,” says Ms. Costello, “to make sure that everything is in order for your IRB or publication submission.” Dr. Filipi also talked about creating a collaborative team to assist with the conduct of research studies.

The 3-hour workshop closed with a discussion of writing abstracts. “It covered a lot of information and I think it was well-received,” Ms. Costello reports. “Heidi and Mary were spectacular speakers and kept the group very engaged.”

The program was so well-received that Ms. Costello queried CMSC Executive Director June Halper about doing a full-day program at the next Annual Meeting. “She will bring our idea to the Program Committee to see if there is a shared interest. We were asked by several attendees to consider a course through the IOMSN or CMSC as an online opportunity,” adds Ms. Costello.

“I feel very fortunate to be a member of the IOMSN,” Ms. Costello adds.

She became involved immediately at the Calgary CMSC meeting in 1997 when June Halper addressed a group of about 50 people who attended a nursing roundtable meeting about starting an organization for nurses. Ms. Halper had the vision to see how such an organization would help nurses and ultimately help patients. In 2002, Ms. Costello became the third IOMSN President. She has continued to remain active on various committees with both the IOMSN and CMSC, both of which provide an ongoing mechanism to develop a tremendous amount of education aimed at the MS nursing community and the MS healthcare community at large, she says.

Schedule:
Registration begins at 8 am; the program begins at 8:30 am and concludes at approximately 4:30 pm.

Topic Outline:
- Nature of MS—Epidemiology, Diagnosis, Natural History, Clinical Course
- Chronic Illness and the Care of the MS Patient
- Treatments—Acute Relapse Management, Disease-modifying Therapies, and Worsening MS
- Practical Management of Complex Symptoms
- New and Emerging MS Therapies and the Role of the MS Nurse
- Research Update
- Wrap up

Those of you who attended the 24th Annual Meeting of the Consortium of MS Centers (CMSC) already know it was a huge success. We were presented with the most up-to-date information and research that will certainly impact on all of us working in multiple sclerosis (MS) care today and for the future. San Antonio was a lovely host city, and there were wonderful opportunities to enjoy this historic city outside of the conference setting.

I am proud to say that rehabilitation content and the International Organization of MS Rehabilitation Therapists (IOMSRT) added to the success of the meeting. Our presence was strong and our contributions were many. The programming not only included many topics that were of interest to rehabilitation professionals, but I chaired a full-day Rehab Track that addressed key issues in rehabilitative care. If you didn’t have an opportunity to attend the meeting, I invite you to view the information posted on our Rehab in Motion page on the CMSC website (www.mscare.org). Slide presentations as well as select videos are now available online.

The fifth annual IOMSRT dinner provided a great evening to network with other rehab professionals and hear about some ongoing research. Dinner presentations included:

“A Comparison of Functional Electric Stimulation (FES) Neuroprosthesis and Ankle Foot Orthosis (AFO) in Persons with Multiple Sclerosis (MS)” by Seema Khurana, DO, University of Miami Multiple Sclerosis Center, Miami, Florida;

“Symptomatic Approach from a Rehabilitative Perspective for Intention Tremor and Fatigue” by Sue Forwell, PhD OT(C), FCAOT, Department of Occupational Science and Occupational Therapy, University of British Columbia, Vancouver, BC; and

“Effectiveness of the Wii on Standing Balance in Individuals with MS” by Lacey Bomley, PT, DPT, Rehabilitation Science, University of Buffalo, Buffalo, NY.

Everyone enjoyed being able to meet or reconnect with their colleagues from across the country. Many thanks go out to our presenters for sharing their time and talents to discuss their current research projects and to everyone who attended.

The meeting was capped off with an awards ceremony acknowledging achievements for work that will add to our best practices in MS. Three rehabilitation professionals were honored for their work (see article on page 4). Congratulations to the winners! Not only have they elevated the knowledge base for rehab professionals, but also for everyone doing MS care.

Patty Bobryk, MHS, PT, MSCS, ATP, Chair, IOMSRT

The IOMSRT wishes to congratulate the following MSCS candidates who completed recertification:

UNITED STATES
Emily D. Kriech

Whether or not you can attend the meeting, we hope you will join the International Organization of Multiple Sclerosis Rehabilitation Therapists (IOMSRT), to keep abreast of all the information and resources we can provide by going to our webpage at www.mscare.org or emailing me directly at pbo-bryk_0604@msn.com. There is no fee to join and you will be notified of all IOMSRT activities.
CMSC Members Continue to Expand the Comprehensive Care Model

Comprehensive care has been the cornerstone of the Consortium of Multiple Sclerosis Centers’ (CMSC) approach to the treatment of multiple sclerosis (MS) since the organization’s inception nearly 25 years ago. Member organization Can Do Multiple Sclerosis (MS), formerly known as the Heuga Center for Multiple Sclerosis, has built a strong platform of empowerment programs to offer patients with MS and their families enhanced support above and beyond the traditional medical treatment and health and wellness programs.

Can Do MS programs include the flagship 5-day CAN DO program so many patients have found life-affirming, as well as a 2-day CAN DO 2 follow-up program, and a 1-day educational program called JUMPSTART. The nationally based multidisciplinary medical staff of Can Do MS develops education and recommendations for overall health management.

CEO Kim Sharkey explains that Can Do MS has a positive impact on more than just the patient’s well-being. “Can Do MS has a positive effect on the entire field of MS care management, including medical providers, allied health professionals, and insurance providers,” she says. Ms. Sharkey has focused the efforts of Can Do MS on broadening the scope of its programs, while also promoting the need for such programs to enhance the lives of patients with MS. The organization has embarked on new partnerships to further promote their programs and message, including a new relationship with the National Multiple Sclerosis Society.

According to CMSC Executive Director, June Halper, “It has become very clear that comprehensive care is the most powerful approach to improving the lives of our patients with MS. All of our members have been committed to this model, and each one brings a unique element to our evolving collaborative paradigm involving a multidisciplinary approach to supporting and enhancing the totality of a patient’s life with MS.”

Ms. Sharkey concurs, noting that, “the healthcare industry is now looking to comprehensive wellness programs as a viable complementary care option and clinically sound approach to reduce healthcare costs while improving the conditions of patients.”

“We are very pleased to see our members successfully navigating a challenging medical climate as we continue our goals of building the future of MS care,” says Ms. Halper. Can Do MS programs have benefitted patients with MS everywhere and we encourage you to contact them directly to learn more.

Can Do MS is a national nonprofit organization based in Edwards, Co. Can Do MS is a provider of innovative lifestyle empowerment programs. The organization uses health, wellness, and lifestyle principles to empower people with the knowledge, skills, tools, and confidence to realize their ability to create well-being and transform their lives. For more information, please visit the organization’s website at www.mscando.org.

Two New Initiatives (Continued from page 3)

interest in building the future of MS care.

A $10,000 scholarship has been awarded to Nelda Patricia Itzep, currently enrolled at the University of Texas Health Science Center at San Antonio School of Medicine. The award will also fund a preceptorship experience at The MS Center of South Texas, a San Antonio CMSC member offering comprehensive MS care.

How Can You Help?

As a CMSC member and MS educator, you can support additional Foundation of CMSC programs through the FCMSC Builders’ Circle Initiative. Your pledge of the equivalent of one honorarium per year will enable additional FCMSC programs to support the mission of the CMSC and its members.
The Patient and Family Education Award for Best Platform is presented each year for the best platform presentation depicting excellence in patient and family education. This award is judged by a panel of CMSC members representing various disciplines caring for persons with MS.

**Research Award for Best Poster: Susan J. Forwell,** L. Dawes, K. McCloy, University of British Columbia, Vancouver, BC, Canada

**For the poster:** Development of a Comprehensive Fatigue Assessment Battery for Multiple Sclerosis

The Research Award is presented for the best poster describing research into comprehensive care in MS, results of which will add to evidence-based practice and improve the quality of life of those affected by the disease.

**Research Award for Best Platform: M. Lopes de Carvalho,** R. Motta, M. Causa, G. Brichetto, AISM Rehabilitation Centre, Italian Multiple Sclerosis Society, Genova, Italy

**For the presentation:** Effectiveness of Urinary Rehabilitation in Multiple Sclerosis Patients

The Research Award is presented for the best platform describing research into comprehensive care in MS, results of which will add to evidence-based practice and improve the quality of life of those affected by MS.

**The Labe C. Scheinberg Award: Susan Bennett,** N. Fisher, LE Bromley, C Decker, W. Howley, M. Rundell, Jacobs Neurological Institute and Rehabilitation Science Department, University of Buffalo, Buffalo, NY

**For the work presented in the poster: Validity, Reliability, and Sensitivity of Three Gait Measures in Multiple Sclerosis**

This award is given in memory of Labe C. Scheinberg, MD, in recognition of the most outstanding work in neurorehabilitation in MS, presented at the CMSC Annual Meeting through a grant from the Foundation of the CMSC, with support by members of the Scheinberg family.

**CMSC Lifetime Achievement Award: Kenneth P. Johnson, MD**

**International Journal of MS Care/Robert J. Herndon Awards** (For an outstanding article in the IJMSC 2009-2010)

**Ruth Ann Marrie, Gary Cutter, Tuula Tyry, Denise Campagnolo, and Timothy Vollmer,** authors, Effect of Physical Comorbidities on Risk of Depression in Multiple Sclerosis

**Kurt L. Johnson, Alyssa M. Bamer, and Robert T. Fraser,** authors, Disease and Demographic Characteristics Associated with Unemployment Among Working-age Adults with Multiple Sclerosis
