Hello Conal,

As you may know, there has been work in MLA to clarify the roles of various ex-officio appointments and consulting relationships to committees. The Membership Committee would like to add a formal consulting relationship with our committee to MLStEP's charge, outlined in the BAR below:

Add consulting with the Membership Committee to the charge of MLStEP. This request is a result of the Parliamentarians' efforts to clarify the roles of various ex-officio appointments and relationships to committees. The Membership Committee currently has two members in the Early Career category, but a consulting relationship with MLStEP is desired to share information and provide feedback about MLStEP's membership drive, the Membership Committee's outreach efforts to students and emerging professionals, membership statistics, and questions and concerns from their membership that may prevent them from remaining with the Association long-term.

The Board said that it's pretty straightforward, but they want to make sure that both sides are on board with it before voting.

Would MLStEP agree to the consulting relationship with the Membership Committee described above?

Thank you and I hope you're well!

Best,
Mallory

That sounds great! I think this will be really valuable, as my understanding is that in addition to supporting out students and emerging professionals, we also try to work as a recruitment and retention arm for MLA. We've been looking for a way to work more closely with other parts of the association.

I will loop in our membership officer, so that we're all on board. (Lencia, does this work for you, as well?)

Thanks for reaching out! Hope you are well!

Conal

This is great news! Mallory, thank you for putting forth this BAR, and Conal, thanks for being open to it and looping in Lencia!

All my best,
Jessica

Hi Conal,

Sure, this sounds like it could be extremely beneficial.

All the best,
Lencia
