

Today's global economic environment has elevated the importance of valuations that support our advisory, tax and audit capabilities. An advisor with experience and presence can help companies respond to both domestic and cross-border valuation challenges.

At Withum, our Tangible Assets Team has the coverage, experience and trusted name you can rely on to help you meet your Plant, Property and Equipment (PP&E) valuation needs. Our experts are professional tested, certified and hold Accredited Senior Appraiser (ASA), Certified Valuation Analyst (CVA), Certified Fraud Examiner (CFE) and Certified Public Accountant (CPA) designations. Our team has directed engagements on behalf of privately held and publicly traded entities' economic concerns and strategic interests with a cross-functional focus amongst a range of purposes in accounting, tax, litigation, finance, insurance, operations and transaction equity investment.

It's with this mindset and understanding that Withum professionals can apply forward-thinking insight to your business strategy.

We recognize that a valuation is not a simple numbers exercise. Instead, we combine our technical skills and practical experience to provide objective advice that aligns with your business goals. We work to understand your business dynamics, as well as sector and value drivers to provide service that goes beyond borders.
