504 Helps Chiropractic Specialists Build New Clinic, Expand Services

Spine & Injury Clinic of Laramie opened its 3,000-square-foot chiropractic clinic in 2008 with a staff of three. By 2015 the owners had more than tripled their staff, added massage and physical therapy to their services and were out of space.

Wanting to design their own state-of-the-art facility, the owners first purchased a vacant parcel of land with the help of an SBA 504. The loan proceeds were used to design and build a new clinic to accommodate an expansion of chiropractic care space and the addition of 10,000 square feet of space for physical therapy, strength training and massage.

Some of the new space now serves as a fitness facility called Altitude Fitness, which offers memberships to the public.

This small business now supports three full-time chiropractic doctors and four physical therapists.
