Anju and Sanil Garg know the banking and ABL (asset-based lending) industry very well. With over 25 years of experience and a passion for the field examination process, this woman-led business has been established since 1999.

Insight Examination Services provides resources and examinations for asset-based lending (ABL). Because they are working with this specific type of lending (lending secured by an asset), they bring a unique set of services to the table, including risk assessments, internal control and system evaluations, deal structuring, eligibility determinations, and much more. Located in Long Beach, CA, they serve San Diego, Central Valley, Palm Springs, and anywhere in between.

For the past few years, Sunil and Auju have been looking for ways to grow their business and invest in additional technology, so they came to AmPac Business Capital for a lending solution for themselves. Together with AmPac with its banking partner, Insight Examinations Services used the SBA 504 Debt Refinance program to refinance a deed of trust secured by their real estate. The program allowed them to get cash out for operating expenses, making their growth more affordable. The Garg’s have been able to utilize this financing solution to grow their business as they had dreamed. Today, they share their thanks:

“It was a long road and there were some detours on the way, but at the end it worked out just as they [AmPac] said... [The team] stayed the course and stayed on the ride with me.

I want to thank [the entire AmPac team] for working so hard on the process and the documentation. Without their help, this would not be possible. I am truly humbled and will sleep well tonight knowing that the working capital part of this loan will help us grow our business and invest in technology.”
