

HOW DO YOU KEEP THE KIDS ENTERTAINED WHEN WORKING FROM HOME?

Tips submitted by NAPABA members

1

TEACH THEM TO COOK

Teach your kids how to cook! They will be proud of their creations, you can eat the food together, & you will be giving them a life skill that will stand in them in good stead the next time restaurants have to close due to a pandemic. (Too soon...?)

2

JOIN A ART PROJECT

Partake in a community art project like **One Philly: Corona Virus Public Art Project**, where a theme is designated every week. Then when you go on walks, your kids will have something to look for in windows that makes them feel more connected!

3

TALK TO THE PANDA

With my energetic three-year-old, I use his favorite panda to tell him to do fun things like coloring, tracing letters and numbers, and playing with toys so that I can focus on work.

Submitted by David Sohn

4

VISIT VIRTUAL MUSEUMS

My 5-year old loves to explore and since our ability to do that right now is limited, we check out virtual tours of museums online. We also do science experiments using household items.

5

WORKOUT TOGETHER

My son and I go for a short bike ride every 2 hours. Helps us be focused on our work for the interim and we look forward to beating each other on the next ride!
