Wow! The NASCLA 2019 Annual Conference in Baltimore, Maryland seems like so long ago. My how things have changed. Since the October 2019 Edition of the NASCLA Newsletter a lot has happened. NASCLA had its first “hands on” mission trip in conjunction with our annual Strategic Planning Meeting in early December. By invitation from the Virgin Islands Board of General Construction Contractors Department of Licensing and Consumer Affairs, we held our meeting in St. Thomas. While there we met with the department and shared our processes and information on how we operate. They were very appreciative. The highlight of our trip was the mission project we could participate in. The NASCLA Executive Committee, Committee Chairs, and Staff worked on the Romeo Malone Community Center. This included painting inside and out, fencing, cleaning up the playground and even Dale Dawson, NASCLA Secretary and Executive Director for the North Carolina State Board of Examiners of Plumbing, Heating and Fire Sprinkler Contractors, cleaning out the grease separator. While there, the kids that were attending the preschool sang us Christmas songs. What an experience. Hopefully, we can do a mission type project every year going forward to assist in the community.

The NASCLA Accredited Examination Program Committee have started working on the HVAC/Mechanical examination classification. The committee has started reaching out to the various associations for their participation and support. The NASCLA Accredited Electrical Examination Program was gaining some steam before the COVID-19 virus changed everything.

NASCLA sadly had to cancel the 2020 Board of Directors Mid-Year Meeting due to the virus. During this meeting, the NASCLA Board of Directors and Committee Chairs were set to scope out the next NASCLA 3-Year Strategic Plan for 2020, 2021 & 2022. We hope to have Michael Barrett, Master Facilitator with Resonance Facilitation conduct this session on the front end of our NASCLA 2020 Annual Conference in Coronado, California. Due to the virus, the NASCLA Executive Committee had a Go-to-Meeting conference call on March 18th for a condensed meeting as well as the NASCLA Board of Directors condensed Go-to-Meeting conference call on March 19th. The minimal and necessary business and voting items were addressed.

Currently we have set up a Go-to-Meeting every Wednesday at 1:00 PM (ET) to update each other on how COVID-19 is affecting our individual state agencies and industry as a whole.

The NASCLA Budget Meeting with NASCLA’s Executive Committee is still scheduled for June 9, 2020 but will be in the form of a virtual meeting.

We will all get through this together and be stronger in the end. Let’s continue to keep each other and the citizens we protect in our thoughts and prayers. What a celebration we will have in Coronado, California, August 30th – September 3rd at the NASCLA 2020 Annual Conference!

Sincerely,

Tim Norman
NASDAQ President
As we fight together against the COVID-19 health crisis, NASCLA has elected to focus on all state members in the spotlight section of this newsletter. We are dedicated and committed to communicating proactively and being a primary resource for critical information for all state agencies, regardless of membership status. Our intention is to provide our state agencies with a platform to have their voices heard within their own professional community, and to share best practices and knowledge. As a result, NASCLA has implemented weekly virtual meetings lead by Tim Norman, NASCLA President. These meetings occur every Wednesday at 10:00 AM (PT)/1:00 PM (ET).

The past three (3) virtual meetings beginning on Wednesday, April 1st have proved successful in having an average of 25+ attendees on the call, both state members and non-state members. During these calls, the following topics were discussed:

1. How is your state managing the health emergency at hand?
2. What, if any, modifications have you made to your existing licensing structure:
   - New Applications
   - Renewal Provisions & Time
   - Testing Extensions
3. Review of the NECA Letter to State Governors and Regulatory Agencies
4. How is your state handling temporary licensing during the current COVID-19 crisis?
5. What is your state doing as far as building services, such as inspections? Are virtual inspections being offered? Building permits?
6. Online examination testing and remote proctoring discussion lead by Brian Moritsch, NASCLA Psychometrician. What is your state agencies' perspective regarding this subject matter?
7. The NASCLA 2020 Annual Conference is currently scheduled for end of August. Do any of your state agencies have travel restrictions or other new provisions that have been implemented or may be implemented that would prevent you from attending the annual conference this year? Should we consider rescheduling for later in the fall?

Moving forward, NASCLA is actively engaging with industry experts to present during our weekly calls to share and discuss economic news, analytics, and the impact of COVID-19 relevant to the construction industry. The next virtual meeting is scheduled for Wednesday, April 22nd. We hope to have you in attendance.

In conjunction with these virtual meetings, we are also encouraging all our state members to provide us with updates on how each state is handling the emergency at hand. We ask that you share with us any modifications you have made to your existing licensing structure (new applications, renewals, and provisions and time extensions, testing etc.). This information can be shared by utilizing the NASCLA Executive Director Forum; more information can be found on page 10 of this newsletter. This sharing of information will help benefit our association and the construction industry as whole.

We know this is an especially stressful time. Please remember to take care of yourself and know that your leadership is appreciated and needed. We are right here with you, ready to support you in any way we can. NASCLA external communications will be posted to our website and can be viewed by clicking here: [https://www.nascla.org/page/COVID-19RESOURCES](https://www.nascla.org/page/COVID-19RESOURCES).

Thank you for your partnership as we adapt to this rapidly changing situation.
On March 12, 2020, the NASCLA Executive Committee conducted an emergency conference call and made the decision to cancel the NASCLA 2020 Board of Directors Mid-Year physical meeting scheduled for March 18 – 20, 2020, in Phoenix, Arizona. At the time, the decision to rescind the meeting was driven by the recent Governor State of Emergency Travel Bans and growing health risks associated with the outbreak of the COVID-19. The health and safety of our members was and still is the primary concern as this global health scare unfolds.

Initially, the NASCLA Executive Committee was hopeful that certain elements of the meeting could be conducted via video conferencing. However, as the pandemic quickly became a larger concern and threat, it was evident that the NASCLA Membership needed their time to be focused on individual state agency operations. At this time, all virtual meetings were canceled except for the NASCLA Board of Directors and Committee Chairs Meeting. This virtual meeting transpired on Thursday, March 19th and the agenda was altered to address the impacts of the coronavirus as it relates to the NASCLA State Members/Agencies, NASCLA financial investment strategies and NASCLA Staff remote scheduling and short-term emergency plan. During this time, there were also discussions on best practices to consider and resources to reference along the way. Additionally, there was dialogue on what specifically NASCLA can do to best serve its membership during this critical time. As a direct result of this meeting, NASCLA has established weekly virtual meetings where state agencies, regardless of membership status, are invited. The meetings occur every Wednesday at 10:00 AM (PT)/1:00 PM (ET) and topics of discussion vary as the pandemic continues to unfold.

NASCLA was fortunate that the financial impact of canceling the NASCLA 2020 Board of Directors Mid-Year Meeting was minimal. Also, worth noting, the NASCLA Strategic Planning Workshop, facilitated by Michael Barrett, Resonance, LLC, has been rescheduled for Sunday, August 30th prior to the start of the NASCLA 2020 Annual Conference. A sincere appreciation is extended to all NASCLA Members and purveyors for their flexibility and understanding while we continue to navigate our way through this difficult time. The NASCLA 2020 Annual Conference is scheduled for August 30 – September 3, 2020 at Loews Coronado Bay Hotel in Coronado, California, where together we will profoundly reconnect!
REGISTRATION IS OPEN!

NASCLA 2020 ANNUAL CONFERENCE

The NASCLA 2020 Annual Conference is scheduled for August 30th - September 3rd at Loews Coronado Bay Hotel in Coronado, California. NASCLA will continue to prepare for the annual conference; however, we are actively monitoring the COVID-19 pandemic as it relates to this meeting. In the meantime, we want you to know we heard you and valued your feedback and the result is that the NASCLA Annual Conference is TRANSFORMING! The NEW mission of the annual conference is to provide relevant high-value conference agenda with speakers that enhance and develop members’ professional growth and development.

NASCLA Staff has developed a task force to assist in speaker recommendations and selections, who offer diversified topics, and aid with the overall program flow. In addition to new and dynamic speakers and topics we are making the following changes to the overall 2020 annual conference experience:

- Add concurrent/educational tracks to the annual conference schedule
- Incorporate more built-in networking time
- Source new speakers that are industry specific including contractors and veterans
- Restructure the State Reports session
- Integrate roundtable and group learning discussions
- Informational session on new technology trends within the industry and how they impact current laws
- Acknowledge sponsors and provide them with stage time opportunities
- Transition from contracting a videographer; instead hire a photographer that also can conduct live feeds on social media channels

We hope that you are inspired about the TRANSFORMATION of the NASCLA 2020 Annual Conference and choose to be in attendance!

We look forward to seeing you in sunny Coronado, California!

To learn more or register for the conference please visit: https://www.nascla.org/page/AnnualConference.

If you have any questions please contact Linda Turnage, NASCLA Business Development Director, via email to linda@nascla.org or by phone (623) 587-9354.

In order to better serve you, we have built comprehensive packages to help grow your community network and enhance your current and new business relationships throughout the entire year. These packages offer a range of choices from stage time, to webinar opportunities, social media branded messages, and more!

To learn more or to sponsor, please visit: https://www.nascla.org/page/Sponsorship

Thank you current NASCLA 2020 Annual Conference Sponsors!
NASCLA ACCREDITED EXAMINATION PROGRAM UPDATES

NASCLA ACCREDITED EXAMINATION FOR COMMERCIAL GENERAL BUILDING CONTRACTORS

JOB ANALYSIS UPDATE
In July 2020, the new Examination Plan for the NASCLA Accredited Examination for Commercial General Building Contractors will be implemented through PSI Services, LLC. For more information on the updated candidate information bulletin, please click here.

ADMINISTERING STATE AGENCY UPDATE
The Arkansas Contractors Licensing Board is administering the NASCLA Accredited Examination for Commercial General Building Contractors through PSI Services, LLC as an option for candidates instead of submitting appropriate experience requirements with their application for licensure.

Is your state agency interested in implementing examinations within the NASCLA Accredited Examination Program? If so, please contact Jacquie Wilberscheid, NASCLA Education Manager, at (623) 587-9354 or via email to jacquie@nascla.org to receive the Test Development Reports and Examination Plans.

For more information including details on participating state agencies and background of the programs please visit: https://www.nascla.org/page/AccreditedExams

NASCLA ACCREDITED ELECTRICAL EXAMINATION PROGRAM

NASCLA has eight (8) State Agencies Administering and/or Accepting examinations within the NASCLA Accredited Electrical Examination Program! Through these examinations, electricians have the opportunity to travel across jurisdictions allowing for contractor mobility and portability in the licensure process. State Agencies can rest easy knowing the examination content is based directly on a current occupational analysis that involved multiple meetings and input from licensed electricians across the country. The examination statistics are continually monitored to ensure that questions are preformed effectively.

NASCLA Accredited Electrical Examination Program

PSI Services, LLC’s owned and operated test centers in the United States will remain closed through Thursday, April 30, 2020. Sites will re-open meeting social distancing and health and safety requirements on Friday, May 1, 2020.

While many third-party test partners practice closures as required by federal, state or local mandates some locations are open in the United States and globally as federal, state and local mandates allow.

All PSI test center closures can be found here: https://www.psonline.com/closures.
New legislation:
Effective December 19, 2019, new regulations were enacted requiring individuals and companies engaging in various construction related disciplines become licensed with the State of Rhode Island Department of Business Regulation’s State Building Office / Contractors’ Registration and Licensing Board (CRLB). More information, including copies of the new regulations can be found on the CRB’s website at www.crb.ri.gov. In addition to the existing regulations for registering commercial and residential contractors and the licensing of Commercial Roofers and Underground Utility Contractors, the new rules and regulations now include the licensing of the following:

- Home Inspectors and Associate Home Inspectors
- Well Drillers
- Pump Installers
- Water Filtration Contractors and Water Filtration Installers

To become licensed, each of these disciplines either requires the applicant(s) to pass an examination, complete pre and continuing education, or a combination of both. Although all new licensing was required to be completed by April 1, 2020, due to the COVID-19 pandemic, all new licensees shall have until May 1, 2020 to become licensed.

Media Recognition:
Several of the CRLB’s continued efforts and recent successes were recognized in the local media:

On August 26, 2019, local CBS affiliate WPRI Channel 12 featured a story announcing the impending promulgation of the law requiring Home Inspectors to be licensed.

On November 27, 2019, local NBC affiliate WJAR Channel 10 aired the story of how the CRLB successfully negotiated the return of $26,500.00 in monetary restitution from a contractor back to the homeowners, whose home had been substantially damaged by fire, however only minimal work was ever completed.

And, on February 25, 2020 WPRI Channel 12 aired a story about the Rhode Island Attorney General’s Office who charged 19 contractors with misdemeanor and felony charges for failing to comply with final orders issued by the CRLB.
GREIN ADVISES WOMEN TO HAVE CONFIDENCE

MARGI GREIN, EXECUTIVE OFFICER

Margi Grein has been Executive Officer of the Nevada State Contractors Board (NSCB) since 1998. Beginning her career as director of finance, Grein worked her way up to the top position with a determined mindset and a willingness to take on new challenges. Her message to women in construction, “Have confidence in yourself.”

“I’ve always believed the world does not owe me something because I am a woman,” she said. “I trusted I could accomplish what I needed to accomplish regardless of the obstacles I may face being a woman in a male-dominated industry. Confidence is what gets us through life. I regulate 16,000 licensed contractors and have benefited greatly from both male and female mentors along the way.

Grein has seen that within the industry, both men and women are equal to the job.

“Right now, only nine percent of the workforce in construction is women,” she said. “Now is a perfect time for women to seek employment. Many workers are retiring and companies need skilled labor and business-minded individuals in order to keep their operations running smoothly. These opportunities are endless. Apprenticeship programs are a great start for someone new to construction. With paid-for training and on-the-job work opportunities, individuals will realize the investment the industry is making in them, while becoming confident in the solid career path they are paving for themselves.

NSCB is committed to ensuring the integrity and professionalism of the construction industry in Nevada. It has the responsibility to promote quality construction by Nevada licensed contractors through a regulatory licensing system designed to protect the health, safety and welfare of the public. The Board is also empowered to promulgate rules and regulations necessary for implementing and enforcing the enabling statute, NRS 624, and to discipline licensees found in violation of the statute.

“I manage a staff of 65 who are located in northern and southern Nevada,” said Grein. “I’m a third generation Nevadan who was born in Reno and is invested in the wellbeing and interests of both ends of the state. Our public safety goals at the Board are fulfilled through our pursuit and education of unlicensed contracting schemes, resolution of consumer complaints, and ongoing outreach to the public about the services of the Board. Empowering homeowners with knowledge on how to verify a contractor is properly licensed and knowing where to turn when issues arise is paramount to our operations. We are proud to serve both the public and industry as we demonstrate the value of construction throughout the State of Nevada.”
The purpose of occupational licensing is to safeguard public health and safety. It is intended to protect consumers by guaranteeing minimum requirements and industry oversight. In contrast, the purpose of workers’ compensation insurance is to protect those who are injured or disabled while working at their jobs. It is intended to eliminate the need for the worker to resort to the courts to obtain these benefits.

The two systems are therefore not directly aligned. They protect different populations: the general consuming public versus laborers and workforce. And they effect different results: standardization of professional industries and consumer expectations versus limitation of workplace injury litigation and employer and employee liability for injuries.

This distinction is seen in the names of the agencies responsible for contractor licensing and workers’ compensation. The following issue areas are among the given titles of the agencies responsible for workers’ compensation in all 50 states: Labor, Labor and Industry, Employment, Workforce, Workforce Development, Industrial Relations, Industrial Accidents, Financial Services, and Insurance. In contrast, the names of state agencies licensing contractors (that are not individual contractor boards or bureaus) include these titles: Commerce, Community, Regulatory Agencies, Business and Professional Regulation, Professional Licensing, Building Safety, Public Protection, and Consumer Affairs. As such, workers’ compensation is a labor and industry issue and contractor licensing is a professional regulation and consumer affairs issue.

So where do these two systems intersect and what is the role of the contractor licensing agency? There is of course plenty of crossover between workers’ compensation requirements and the goal of consumer protection. The most obvious example is that a consumer may be found by state law to be the “legal employer” of an unlicensed worker who is injured on a jobsite while working for an under-insured contractor. In such cases, the public policy of compensating the injured worker may outweigh the unfairness of holding the owner of the project responsible. As a result, requiring a contractor to have workers’ compensation insurance if they have employees has a consumer protection benefit.

Still, requiring a contractor to have workers’ compensation if they have employees is less of a licensing requirement than it is a general legal requirement regardless of the licensed profession. In most states, if an employer – regardless of profession – has one or more employees, they simply must have workers’ compensation insurance or self-insure, with few exceptions.

And is protecting a consumer from being considered a legal employer of a worker the same kind of consumer protection envisioned by a licensing program? One could argue that by hiring a contractor who is unlicensed or has uninsured workers, the project owner stops being a “consumer” and becomes part of the workforce by becoming an “employer” for workers’ compensation purposes. They would thus fall squarely outside of the intended population protected by the licensing laws. A similar legal fiction occurs, at least in California, when a homeowner decides to hire their own labor as bonafide employees for wages to improve their own home – they become exempt from the contractor licensing laws.
Of course, it seems overly convenient for a licensing agency to simply leave the workers’ compensation responsibility to the labor and workforce entities responsible for oversight. Indeed, multiple state contractor licensing agencies have workers’ compensation requirements, including California. We posted a workers’ compensation insurance inquiry in the NASCLA Executive Director Community Forum, and Arizona, Arkansas, Hawaii, Mississippi, Nevada, North Carolina, Oregon, Rhode Island, and South Carolina responded. All but one of the states require a contractor to have workers’ compensation if they have employees. Oregon is unique in requiring commercial contractors to have workers’ compensation regardless of whether they have employees but allows residential contractors to have an exemption.

However, it is evident that all states polled, and California as well, provide some form of exemption for contractors without employees. As a result of this fact, the role of the licensing agency is necessarily limited in enforcing workers’ compensation requirements. This is because most licensing agencies lack the resources to prioritize enforcement of workers compensation insurance requirements and identify the cheaters and those who claim to have no employees when they do.

The California Contractors State License Board (CSLB) has witnessed this reality firsthand. A licensee’s failure to obtain a workers’ compensation insurance policy when having employees and/or having a false exemption on file is a widespread issue among contractors. Since 2016, CSLB has alleged that a licensed contractor’s exemption from workers’ compensation was false a total of 878 times and took disciplinary action in 194 of those cases. Nonetheless, in this same period, 55 to 58% of CSLB’s roughly 230,000 actively licensed contractors (or around 130,000 contractors) routinely have an exemption from workers’ compensation on file. California’s construction industry professionals, CSLB Board members and staff all find it difficult to believe that this many contractors do not have a single employee at a given time.

One California construction industry resorted to the legislature to simply require workers’ compensation of its contractors. Citing the dangers of roofing and evidence of fraud in the trade, the California legislature required all roofing contractors to have proof of workers’ compensation insurance on file with CSLB, whether they have employees or not. It began as a multi-year pilot program and became permanent January 1, 2013.9

This legislative change effectively “eliminated” the workers’ compensation problem for CSLB for that trade – there would no longer be any instance of CSLB needing to discipline a contractor for failing to have workers’ compensation insurance on file with CSLB.

Based on the aforementioned NASCLA inquiry it conducted, CSLB believes it is the only state contractor licensing agency – of those that responded – that requires workers’ compensation for one of its trades regardless of whether they employ anyone or contract commercially, residentially, in public works, etc. So there is not much evidence other than its own experience whether the requirement has been effective in addressing issues of the underground economy in the roofing industry.10

Nonetheless, the Board has grown wary of the tendency of most California contractors to claim they do not have employees. As a result, staff have developed proposed legislation to mandate workers’ compensation insurance for additional license classifications. At a January 2020 meeting of industry, CSLB staff and two (2) board members, a proposal was presented to mandate workers’
compensation for three classifications likely to have employees: Concrete; HVAC; and Tree Service Contractors. Representatives of those industries were present and supported the measure. CSLB staff will present the legislative proposal at a scheduled June 4, 2020 board meeting.

We believe the legislature will be supportive of the proposal, based on raising the issue during our 2019 quadrennial "Sunset Review" by the Legislature However, there may now be concerns of erecting additional barriers to licensure at a time when the economy is recovering from the COVID-19 health issue. We will keep you apprised of California's efforts to extend workers' compensation requirements to other trades.

ENDNOTES

2 Ibid.
4 Ibid.
6 “Industrial Relations” is defined by the Oxford Dictionary is “the relations between management and workers in industry.”
7 It appears in some states, contractor licensing authorities are organized under large “Labor”, “Workforce,” or “Industrial” agencies despite serving their separate functions.
8 See California Business and Professions Code § 7044.
10 However, CSLB’s research suggests that roofing premium rates have not been reduced since the time CSLB’s requirement was imposed.
The NASCLA Contractor’s State Licensing Information Directory is a summary of contractor licensing requirements of the 50 states identifying more than 180 state agencies that regulate the construction industry. The directory summarizes the pre-qualification, licensing, examination and bonding requirements. Information regarding reciprocity, license classifications, incorporating requirements and fees is also included.

The NASCLA Contractor’s State Licensing Information Directory 2020 Edition was released March 17, 2020.

Price: $55.00 plus shipping and applicable taxes
To purchase this publication, please visit the NASCLA Bookstore.

The NASCLA Contractor Scholarship Program is designed to help students pursue licenses, certificates and/or certifications in the construction industry preparing them for gainful employment. These specific scholarships provide a chance for three (3) recipients to be awarded up to $2,500 towards program tuition. The scholarship awards go as follows: 1st place winner will be awarded $2,500, 2nd place winner will be awarded $1,500 and the 3rd place winner will be awarded $1,000. Each recipient will receive a complimentary invite package to our upcoming NASCLA 2020 Annual Conference. The award includes tuition reimbursement, travel arrangements, hotel and conference registration. The opportunity provides industry-wide recognition, networking opportunities, conference mentor and the option to participate in a moderated panel discussion and a certificate of attendance.

Please keep in mind you will be judged by industry professionals and your application should reflect creativity, innovation, passion and your ability to communicate.

Check https://www.nascla.org/page/NASCLAScholarshipApp for updates and more information.

Applications accepted through June 6, 2020.
NASCLA COMMUNITY FORUMS

NASCLA’s Community Forums are a secure area for you to connect and engage with your fellow colleagues. NASCLA offers several different forums and encourages postings from members on important information along with an area to ask questions of your fellow counterparts. The NASCLA Community Forums offered are listed below:

- Executive Director Forum – State Members Only
- Public Information Officers – State Members Only
- Enforcement/Investigators – State Members Only
- IT Personnel – State Members Only
- Attorneys
- Contractors

The Community Forum page is extremely important for NASCLA State Members as this forum replaces the NASCLA InfoShare system that was previously used to ask questions and share information with your counterparts. Please see the steps below on how to post within these forums:

1. Once signed in, under Member Resources in the Top Navigation Bar, Hover over Community Forums; Select the Forum in which you want to post the question.
2. On the Community Forum Landing Page, Click on the Link to Access the NASCLA Forum.
3. Click on the New Topic button and complete the below information:
   - Subject
   - Post question in box
   - Attach any files
   - Submit Post
4. To Receive Notifications on Your Post:
   - Select Thread Actions
   - Select Subscribe to Instant Updates (this will allow you to receive notifications every time someone posts to the thread/answers questions)

NASCLA COVID-19 RESOURCES

NASCLA has a dedicated website page for all things COVID-19 as it relates to our association and the industry as a whole. Resources on this page https://www.nascla.org/page/COVID-19RESOURCES include links to:

NASCLA CALENDAR OF EVENTS

FISCAL YEAR 2019/2020

JUNE 9 2020

NASCLA Budget Meeting
Location
Virtual Meeting

NASCLA's Executive Committee will meet virtually to review the interim financials and prepare the NASCLA forecasted budget for Fiscal Year 2020/2021.

AUGUST 30-31 2020

NASCLA Investigator Training Program at the NASCLA 2020 Annual Conference
Location
Coronado, California

This training is a great opportunity for your agency's investigators to receive valuable information from top experts in legal and investigative matters.

AUGUST 31 2020

NASCLA Attorney Training Program at the NASCLA 2020 Annual Conference
Location
Coronado, California

This training is a great opportunity for your agency's attorneys to receive valuable information from top experts in legal and ethical matters.

AUGUST 30 - SEPTEMBER 3 2020

NASCLA 2020 Annual Conference
Location
Coronado, California

NASCLA's Annual Conference is where NASCLA Members come together to discuss current issues relevant to the regulation of contractors. The conference also provides a forum for participants to interact and exchange information on current issues in the industry.

NATIONAL ASSOCIATION OF STATE CONTRACTORS LICENSING AGENCIES

F 623.587.9625
info@nascla.org
www.nascla.org

Founded in 1962, the National Association of State Contractors Licensing Agencies (NASCLA) is a nonprofit organization whose purpose is to promote best practices and license uniformity for agencies that regulate the construction industry. By upholding dedication to the assistance of contractor licensing and enforcement agencies, trade associations, and members of the construction industry, NASCLA serves as a vital resource for its members and the contracting community.
