

# Grid Score Sheet

Tabulate your score for each position on the Grid by entering the number of points you assigned for each response on the Grid Assessment and summing the points for each style. For example, if you assigned 5 points to alternative (a) under Group 2 on the Grid Assessment, you would enter 5 points in the second block of the 5,5 column. The points for (c) under Group 1 would be entered in the first block of the 5,5 column.
