Pre-Conference Session
Creating and Sustaining Momentum Through Registered Apprenticeship Networks

Presented by: Registered Apprenticeship Center of Excellence

Description:
The field of Registered Apprenticeship (RA) is experiencing rapid growth, and whether you are an expert or new to this domain, this pre-conference session aims to facilitate collaboration among all RA stakeholders in your region. This session will feature the U.S. DOL’s Registered Apprenticeship Technical Assistance Center of Excellence for Strategic Partnerships and System Alignment operated by Safal Partners. You will hear from representatives from various apprenticeship networks nationwide involving industry, labor, workforce, education, intermediaries, and/or other stakeholders with regard to strategies for expanding apprenticeship opportunities within a specific geographic area, targeting special demographics, and addressing critical occupational needs within an industry sector. Additionally, you will learn about a recently conducted survey and its findings related to organizations involved in apprenticeship networks. This interactive session will guide participants on launching an apprenticeship network, identifying RA partners, understanding the benefits and outcomes of RA, and learning from established organizational experiences. Attendees will leave the session with information on outlining their customized action plans for establishing their own apprenticeship networks.

Learning Objectives:
- Understand an Apprenticeship Network and how it can benefit your Registered Apprenticeship efforts.
- Discover the lessons learned from already-established Apprenticeship Networks.
- Begin your own action plan for creating your own Apprenticeship Network.
