NCAN’s research documents the prevalence of “unaffordability” at public two-year and four-year institutions for students from low- and moderate-income families. The following charts demonstrate the affordability landscape of postsecondary education. When net price and emergency expenses are not covered by subsidized loans and student earnings from part-time employment, NCAN defines the remaining deficit as an “affordability gap.” In instances where the sum of loans and wages equals or surpasses the sum of net price and emergency costs, we refer to the surplus as “an affordability margin.”
