Custom Water Treatment Programs
Designed by Professionals Since 1990

**POTABLE**
- Chlorine Dioxide for Stage 2 Compliance Assurance
- TMB 471 Copper Sulfate - algae control
- Real time Microbiological Testing - ATP & ELISA testing
- Enhanced Disinfection
- Corrosion Inhibition Program
- Iron & Manganese Control
- NSF Certified & EPA Approved Products

**WASTEWATER**
- Sludge Dewatering
- Polymers
- Dechlorination
- Testing
- Technical Support / Service

Diving & Underwater Construction

Serving the Water Treatment and Wastewater Treatment Industries throughout the Southeast

- Potable & Contaminated Diving
- Pipeline & Tunnel Penetrations
- Elevated Tank & Clearwell Inspection / Cleaning
- Traveling Screen & Trash Rack Maintenance / Repair
- Pump Station Maintenance
- Gate & Valve Maintenance / Repair
- Digital Video Inspections With Detailed Written Reports
- Underwater Burning & Welding

Welcome to our *NC Currents* Buyers’ Guide. On the following pages, you will find information that will help you meet your purchasing requirements throughout the year ahead. The initial three pages of this Guide list categories of products and services along with the various companies that can provide them to you. The remaining six pages provide an alphabetical listing of the companies as well as the contact information you will need to reach them. All companies listed in this Buyers’ Guide are advertisers in this issue of *NC Currents*.

ClearWater Represents more than 65 manufacturers of water and wastewater equipment in North Carolina, South Carolina and Virginia.

Our Offices and sales staff are located throughout the three state region. ClearWater has the proximity, experience and technical expertise demanded by today's water and wastewater customers.

The ClearWater service team can provide startup service, pump and process equipment service and repair, pump rebuilds and a full service motor and machine shop.

Mission SCADA Works Right Out Of The Box, But Won’t Box You In

Mission managed SCADA systems are designed to get you up and running in hours, not days. Our packages start at around $1,000 with a maintenance fee of less than $1 a day. Mission strives for ease in doing business. Give us a try – no bureaucratic red tape, no huge commitment. If you like it, buy it. If not, send it back. It’s that simple.

Mission flexibility allows you to expand your system as you are ready and on your terms. Mix and match any of our products one at a time or all at once, the choice is yours. That is why you will find Mission SCADA in over 1,900 municipalities across the United States and Canada.

Advanced Monitoring • Low Cost • Managed SCADA
Hydrogen sulfide prevention/odor control is one of the biggest problems that the wastewater industry faces. Not only does H₂S cause unpleasant odors, but also causes extensive corrosion to occur within the wastewater system.

Cal-x plus is a proven solution and is a non-hazardous, non-corrosive product designed to prevent the production of H₂S. Cal-x plus contains advanced technologies to perform greater benefits within the collection system by adding oxygen and alternative oxygen sources to prevent H₂S from occurring.

Advantages of Cal-x plus

- Additional oxygen within wastewater
- Nonhazardous/non-corrosive
- Prevents corrosion to underground inventory
- Proven solution
- Specialized analysis and dosing rate considerations
- Reduced health risks
- Reduces BOD
- Cost effective
- Fights other odors commonly found in the wastewater collection system

TEAM® Industrial Services

Live Valve Insertion without service interruption...

100% American Made
To meet your “Buy American” funding requirements

InsertValve™
Team’s patented InsertValve delivers value, reliability and performance second to none.

Does your InsertValve have these advantageous characteristics? If not, check out our this QR-code for a product demonstration of the Team InsertValve.

- 10 mil epoxy that is NSF-61
- 250 psi ductile construction
- MJ connections for pipe placement
- Resilient Wedge that seals on self (not host pipe)
- Poured and assembled in the USA

Formed in 1928, NC AWWA-WEA is a volunteer association operating jointly under one board of trustees as the North Carolina Section of the American Water Works Association (NC AWWA) and the North Carolina Member Association (MA) of the Water Environment Federation (NC WEA). We are dedicated to providing water and wastewater education, training, and leadership in an effort to protect public health and the environment. In striving to be the leading educational resource for water-related issues in North Carolina, we recognize the broad scope of the industry and its reach beyond water sources, treatment plants, and pipe systems and its importance in homes, businesses, and the community.

We have close to 3,000 members in North Carolina representing municipal and private utilities, consulting engineering firms, government agencies, equipment suppliers, service providers, and representatives from academia. Working through a network of committees, our volunteers provide the foundation for all Association activities.

**VISION**

(What we strive to achieve)

NC AWWA-WEA: THE leading educational resource for safe water in NC.

**MISSION**

(The purpose of what we do)

NC AWWA-WEA is dedicated to providing water education, training and leadership to protect public health and the environment.

To reach North Carolina’s water industry professionals through the *NC Currents* magazine and its targeted readership, contact Al at your earliest convenience to discuss your company’s promotional plans.

**Al Whalen**, Marketing Manager

Free up your budget & resources with **Cloud-Based SCADA.**

Monitor & control your system from anywhere without spending a fortune.

We offer around-the-clock support and service throughout the life of our products. Our solution utilizes field units, satellite, cellular or ethernet communications, and the Internet to monitor and provide automatic control of your systems.

Via our TelemetryVIEW graphical interface software, you can view data and initiate manual controls from any Internet-connected device. Simply by logging in to a secure web page, you will have access to information about pump runtimes, electrical consumption, flow rates and more.
