

Bringing a World of Energy Experience Together

2020 Virtual Fuels Conference – September 30, 2020

Corporate Sponsors

Daymark Energy Advisors

Daymark Energy Advisors provides management and investment advisory services, supported by the highest quality analytics, to the North American electricity and natural gas industries. For 40 years we have proudly served a diverse client base, including electric and gas utilities, suppliers and large end-use consumers, developers and investors, and regulatory commissions and public policy organizations across the U.S. and Canada. We work closely with our clients to help them make the best possible decisions.

Please visit us at www.DaymarkEA.com to learn more about our team.

Energzyt

Energzyt offers a comprehensive set of business advisory services and analytical product offerings for companies operating in the energy industry.

Whether investing in the energy industry, improving operations, or aligning an asset portfolio with strategic direction, Energzyt offers global expertise, cutting-edge analytics and relevant business experience to provide clients with a leading advantage.

GLOBAL TEAM OF ENERGY EXPERTS

Energzyt is a global collaboration of energy experts who create value for our clients through actionable insights. Combining deep industry expertise with state of the art analytical capabilities, we help companies make informed business decisions that create competitive advantage. With changing dynamics of the energy industries increasing market uncertainty and business risk, a more rigorous approach is required.

MULTIDISCIPLINED AREAS OF EXPERTISE

Energzyt is structured into three functional areas of excellence that include advisory services, industry analytics, and support for business development functions. Energzyt consists of a core team of energy experts representing the power sector, transmission, natural gas industry, coal markets, environmental policy and finance, along with an overseas team that offers operational research, programming and modeling support.

APPLIED EXPERIENCE

Members of the Energzyt team have long-standing history working in industry, economic consulting firms, management consulting firms, private equity, research companies, engineering companies and government. The combination of industry expertise, market experience, and advanced analytics brings a unique set of market insights that are supported by facts and defensible in a court of law or regulatory hearing.

To learn more, please visit our website at: www.energyzt.com or contact us at 888-479-9444.

Eversource

Eversource (NYSE: ES) transmits and delivers electricity and natural gas and supplies water to approximately 4 million customers in Connecticut, Massachusetts and New Hampshire. Recognized as the top U.S. utility for its energy efficiency programs by the sustainability advocacy organization Ceres, Eversource harnesses the commitment of about 8,000 employees across three states to build a single, united company around the mission of safely delivering reliable energy and water with superior customer service. For more information, please visit our website (www.eversource.com) and follow us on Twitter ([@EversourceCorp](https://twitter.com/EversourceCorp)) and Facebook (facebook.com/EversourceEnergy). For more information on our water services, visit www.aquarionwater.com.

Gaz Métro LNG, a subsidiary of Énergir, the new Gaz Métro

Énergir sells LNG through its subsidiary Gaz Métro LNG to many regions including customers in the U.S. North-East. Liquefied natural gas comes from Énergir's liquefaction, storage and regasification (LSR) plant in Montréal East. This plant, which has been operating for 45 years, can produce more than 9 billion cubic feet/year.

With more than \$6 billion US in assets, Énergir is a diversified energy company whose mission is to meet the energy needs of its 525,000 customers and the communities it serves in an increasingly sustainable way. In Québec, it is the leading natural gas distribution company and also produces, through its subsidiaries, electricity from wind power.

In the United States, through its subsidiaries, the company operates in nearly fifteen states, where it produces electricity from hydraulic, wind and solar sources, in addition to being the leading electricity distributor and the sole natural gas distributor in Vermont. Énergir values energy efficiency and invests both resources and efforts in innovative energy projects such as renewable natural gas and liquefied and compressed natural gas. Through its subsidiaries, it also provides a variety of energy services.

Gaz Métro LNG offers known, stable and competitive pricing based on a simple supply chain negotiated in Canadian dollars as well as personalised services to meet the different needs of its customers.

New England Power Generators Association

The New England Power Generators Association (NEPGA) is the trade association representing competitive power generators in New England. NEPGA's member companies represent nearly 90% of the installed capacity in New England. NEPGA's mission is to support competitive wholesale electricity markets in New England. NEPGA believes that open markets guided by stable public policies are the best means to provide reliable and competitively-priced electricity for consumers. A sensible, market-based approach furthers economic development, jobs and balanced environmental policy for the region.

Shell Energy North America (US), L.P.

Shell Energy provides a comprehensive portfolio of energy related products and services to utilities, commercial and industrial end-users, energy aggregators, and oil and gas producers. With annual North American gas sales volumes of over 11 Bcf/d, and U.S. wholesale power sales of 190 million MWh, Shell Energy is one of the largest energy suppliers in North America.

Shell Energy's key product offerings include natural gas and power marketing, trading, risk products, asset and supply management, and structured products. These products are delivered by an integrated delivery system supported by some of the most skilled energy professionals in the world.

Shell Energy North America is a wholly owned subsidiary of Royal Dutch Shell plc (Shell) and operates as a part of the global Shell Trading network. The company is headquartered in Houston, Texas, with offices located throughout North America.

TRC

TRC is a leader in the provision of siting, environmental permitting, engineering and compliance testing services to energy companies on a national basis. The depth and breadth of our capabilities, and our commitment to the energy sector, has resulted in a focus on full life-cycle support of energy projects. TRC's multi-disciplinary staff of over 4,200 scientists, engineers, planners and program managers have successfully completed site selection studies, critical flow permitting reviews, environmental impact statements, media specific permitting (i.e., air, water), regulatory compliance audits and due diligence studies for a wide range of electric power generation, natural gas and liquids pipeline, liquefied natural gas terminals and storage facilities, and electric distribution and transmission facilities across the United States.

TRC has extensive experience with the complete range of electric generating technologies in operation and being developed, including fossil fuel, nuclear, hydroelectric, wind, solar, battery storage, biomass, and fuel cells. We pride ourselves on our long-term relationships with repeat clients, and our history of support on projects that extend from site selection and critical issues evaluation through design and environmental licensing and into construction support and environmental compliance support during facility operations. With the acquisition of Willbros Pipeline Services in late 2015, TRC has expanded capabilities to provide right-of-way and land agent support, siting and routing studies, pipeline design, integrity management, and construction oversight services along with our traditional siting and licensing of both FERC-regulated and non-regulated pipelines.

RTO Insider (Media Partner)

RTO Insider™ is your eyes and ears on the organized electric markets, putting you “inside the room” at CAISO, ERCOT, ISO-NE, MISO, NYISO, PJM Interconnection and SPP. We provide independent, objective coverage and analysis of the wholesale electric industry's markets and policymaking, saving you time and ensuring you don't miss the issues most important to your interests.

Features include:

- Coverage of key RTO/ISO committee, subcommittee and task force meetings. We'll be there when you can't.
- Coverage of news events impacting the industry throughout the 35 states managed by the RTOs/ISOs.
- Coverage of state and federal regulatory (FERC, EPA) & legislative news affecting RTO/ISO stakeholders.
