Subject: RedSky IPR Notice

Hi all,

RedSky was recently awarded two new patents for functional elements that are discussed in various working groups. I talked to Trey about the appropriate process for letting everyone know about them. He suggested that I announce them on the next working group calls that I participate in. I offered to provide not only the announcement, but the Patent number and issue dates for the minutes. To make it easier for you, I have listed the patents that will be announced.

U.S. Patent No. 8,442,481, issued 5.14.13 for Red Sky's PSAP gateway system (LPG)
U.S. Patent No. 8,442,482, issued 5.14.13 for Red Sky's E-LIS system (LIS)
U.S. Patent No. 7,937,067, issued 5.03.11 for Red Sky's E-LIS system (LIS)

NENA is in the process of updating its IPR process, including the associated forms. Trey suggested waiting until the forms, specifically the Patent Information Form and Licensing Declaration Agreement Form, were updated before submitting them to NENA. As soon as the forms are stable, we will submit them as well.

Please include the information in the minutes for the meetings that you take minutes on.

Please don't hesitate to contact me if you have any questions in regard to this matter,

Jerry
