**Instructions for NENA DOCUMENT CORRECTION FORM:**

1. The Originator completes Section 1 and e-mails the form to the NENA Committee Resource Manager (CRM) at crm@nena.org. *(If necessary, attach additional pages.)*
2. Requests are assigned and handled per Section 7.3.2, NENA Document Correction Form NENA-ADM-007, of NENA-ADM-002.

**Description of Problem** *(Identify Section number and page of Standard)*

1. At the request of EENA/ETSI to harmonize our standards for international application, NENA-STA-010.3-2021 was modified. In Section 2.1.6 Call Identifier (page 23), the change was to modify the Call Identifier from “urn:nena:uid:callid:” to “urn:emergency:uid:callid:.” The document editor was directed to change all instances in the document from “nena” to “emergency”, as appropriate.

A single instance of “nenaCallIncidentId” was recently found in the published document, in Section 3.4.10.4.1, the XML Schema Definition of the Call and Incident ID Extension to LoST.

2. There is an error in an example appearing in Section 4.7.1 Attended Transfers (page 206). The example is missing escaped angle brackets that incorrectly indicates that the “purpose=emergency-eido” is a parameter to the HTTP URI instead of the Call-Info header.

**Section 2 - Corrective Action**

*To Be Completed by either the CRM or the Co-Chairs of the Authoring Committee/Working Group, as required*

Please provide input for all fields

<table>
<thead>
<tr>
<th>Authoring Committee - 911 Core Services Committee</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Co-Chair Name/E-mail</strong></td>
</tr>
<tr>
<td><strong>Co-Chair Name/E-mail</strong></td>
</tr>
</tbody>
</table>

<table>

<th>Assigned Working Group – i3 Architecture Working Group</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Co-Chair Name/E-mail</strong></td>
</tr>
<tr>
<td><strong>Co-Chair Name/E-mail</strong></td>
</tr>
</tbody>
</table>

**Determination of Working Group and Recommended Action (What changes were made?):**

The working group agrees that these corrections should be considered as Scrivener’s Errors and should be made as presented above. Since there would be harm caused in implementations if not corrected in the near-term, the Working Group recommends errata correction by generating a revision of the Standard (NENA-STA-010.3.1-2021).
