Meeting Notes

Daylighting Potential Rating Procedure Task Group
Thursday, October 27, 2016
1:00 p.m. – 2:00 p.m. EDT
Chair: Ray Garries

2. The presentation from the Denver, CO meeting was reviewed.

3. S. Scism noted that a survey needs to be conducted to see where the level of need or desire for this rating exists with consumers per Board input.

4. M./ Scism will check with marketing to see if there is a database of people who check into website that can be used to send survey.

5. K. Haglund noted that the Board did not take any position on this, and agrees that research needs to be done to determine the usefulness, and whether or not the consumer want it.

6. There was discussion about using the EWC contacts (500 contacts) for survey distribution.

7. R. Garries noted that the group needs windows and daylighting group/LBNL help with data. Might be easier to do a rating for two parameters (south and north), and annualized VT rating after using daylight resource data to obtain a lumen rating. Have LBNL take 2, 3, 4 products that we want to have rated. Do the calculations for north and south using daylight resource applied to the daylighting rating, to get lumen rating, to see where these ratings start to fall. R. Garries will contact C. Curjica to see if this can be started.

8. R. Garries will get back to the group regarding the next meeting.
