1. Call to Order

2. Appointed Recording Secretary- J. Allardyce

3. Anti-Trust reminder.

4. Meeting Agenda reviewed and approved.

5. New Business

A. Reviewed the negative comments to the proposed ballot to revise NFRC 100 to add the “Simplified Door Rating Method”.

a. 001: Where are the calculations that justify the accuracy of the Simplified vs Detailed Door Rating Method? Do the differences appear at the 3rd and 4th decimal place? Will consumers be confused by the use of two calculation methods? Perhaps this data needs to be published for peer review prior to passage of this amendment. Answer: Calculations were presented at a TG meeting 2 years ago but were not posted online. They will be made available ASAP. Consumer confusion will be minimized because they aren’t aware of the calculation methods.

b. 002: Shouldn’t there be additional materials included in the list of options for the doorglass surround area? It currently lists only 4 options. Does the absence of additional materials hinder innovation of new materials? Answer: The absence of additional materials hinders innovation of new materials only to the extent that the new material is not included in the 1.5” periphery of the doorglass. The rest of the doorslab gets full “credit” for the new material because the doorslab simulation is performed with those innovative materials.

c. 003: A question about Curtain Wall and Storefront units. Answer: The new text in this amendment is from a prior Technician Interpretation.

d. 004: Concerns about confusing drawings in the new document. We agreed to add “as shown in Figure 5-10” to the appropriate area of the document. Concerns about the text “Opaque”, should this be wordsmithed? Concerns about the justification calculations not being made public.

e. 005: This concern was withdrawn.
Meeting Notes

f. 006: Storm door. This comment is part of a Technical Interpretation and needs to be reviewed by TIPC.

g. 007: Multiple changes to the wording of the document that were intended to be 100% editorial. Steve J. and Dave DB will review these comments prior to the presentation at tomorrow’s presentation to the membership.

2 Next steps, modify NFRC 200 for SHGC:

   Once NFRC 100 is amended, then we should start a Work Group to amend NFRC 200 for SHGC.

3 The meeting adjourned at 2:22 p.m.
