Name of Meeting: Door TG

Chairman: Steve Jasperson, (Therma-Tru)

Recording Secretary: J. Allardyce

Call to Order Tuesday, January 12, 2016 Scheduled Time: 11:30 AM – 12:30 PM EDT

Approval of Agenda: NA

Business of Meeting: (listed below)

1. S. Jasperson (Chair) called the meeting to order 11:32 am EDT.
2. J. Allardyce took notes.
3. Anti-Trust reminder.
4. Items for Discussion:
   i. There was discussion of additional revisions to NFRC 100. We discussed the best method of describing the size of the door surrounding the doorlite for the SDR methodology. We settled on this:
      a. Add dimensions to Figure 5-10 of:
         - 38mm (1.50”) in distance from the door cutout to the boundary of the doorlite-surround,
         - keep the dimension of 25mm (1”) of exposed door beyond the doorlite frame to the boundary of the doorlite-surround,
         - add 44mm (1.75”) in door overall thickness,
         - add skin thickness of 0.6mm (0.024”) for steel skins,
         - add skin thickness of 1.9mm (0.075”) for fiberglass skins.
   ii. Discussed New Business: Adding an acceptable tolerance for the thickness of the door and door skins to qualify for the SDR methodology.
      a. We added section F to 5.2.4 to describe the allowable range of door thickness and wall thickness (steel and fiberglass) that is required to meet the accuracy requirements of the SDR methodology.
   iii. New Business Items: Finalize section 5.2.4.F at our next meeting.
   iv. Next conference calls: January-21-16-Thursday-2:30-3:30 EDT, and February-2-2016-Tuesday-11-Noon, EDT.
   v. Meeting adjourned at 12:29pm
