U.S.-China Working Group on Green Building Product

We are excited to announce that NFRC was a contributor to the Pacific Northwest National Laboratory’s report “A Roadmap for Green Building Products in China Towards a National Standard, Testing, Certification and Labeling System.” It was a great pleasure to partner with similarly-minded organizations in order to discuss the importance of how certifications expand the market for green building products. To check out our contributions and read the full report, click below:

Trade Shows / Conferences

NFMT brings together more than 150 of the facilities industry key players and provides free education, product showcasing and networking to facility professionals.

NFRC attended the event providing facilities management professionals about the role its ratings play in managing a facility's energy usage. Ensuring windows, doors, and skylights are as efficient as possible saving energy, reducing heating, cooling, and lighting costs, and improving the comfort of buildings.

Greenbuild International Conference and Expo - Nov. 14 - 16, 2018 in Chicago, IL.

Each year, Greenbuild International attracts thousands of people from around the globe to discuss products, technologies, and ideas transforming communities and the way in which people live and work in buildings.

NFRC attended the event educating attendees on the importance ensuring the next-generation green buildings include tested and certified fenestration products.
Celebrate with NFRC!

In 2019, NFRC will mark its 30 years as the leading, independent nonprofit ratings organization for window, door, and skylight energy performance. To celebrate this milestone, we kicked off the campaign “Mission Possible -- Celebrating NFRC's 30th Anniversary” at the membership meeting in October. This effort highlights 30 milestones and accomplishments of its members as well as the advances over the years in the fenestration industry.

How can you be involved? We need you to share your success story with us. Send us a brief (250 words max) write up that includes ways your business has grown, improved or transformed in the last 30 years and how NFRC has positively influenced this progress. Did you capture these moments on camera? Send those our way as well!
