The schedule and details will be available soon on the Meeting Resources Page.

2019 Spring Committee Meeting
March 25 - 27, 2019
Baltimore, Maryland

NFRC Shares Fenestration Rating Program with Chinese Delegation
The Chinese government, which wants to promote energy efficient windows, doors and skylights throughout China with a national green building standards program, joined NFRC to learn about the systems and procedures in the United States.

NFRC 101 Appendices A and B Webinar
Members and participants are invited to a free webinar to review the proposed changes to the generic material lists in NFRC 101. These lists are the basis for the generic materials used in NFRC simulations by all participants in any NFRC certification program.

Throughout 2018, the NFRC 101 Task Group has worked to update the referenced sources for the conductivities of these materials to ensure the most accurate simulations possible.

When: Thursday, January 17, 2019
Time: 1:00 - 2:30 PM
For more information about the webinar click here.

Celebrate with NFRC!

Did you know, NFRC celebrates 30 years of promoting energy performance with "Mission Possible" campaign, highlighting the accomplishments of our members. Help us celebrate; we want to hear from you! Tell us how the NFRC label transformed your business.
