 - Inboard lite: *CLEAR_6.DAT* (ID 103)
- Spacer Edge-Seal Assembly:
 - Spacer: *Intercept TPU*
 - Sealant(s): *Butyl Rubber*, primary ; *Silicone*, secondary
 - Overall height: 17/32"

CMAST Tutorial #5:

Creating a Project for Label Certificate

** References to "ACE" in this document refer to ACE's who work for an ACE organization.**

Step 1 – Once the project has been uploaded/downloaded and a bid report generated (if necessary), an ACE can generate a label certificate by doing the following:

By selecting Upload/Project/Submit Label Certificate and any projects that are available for submittal will appear in orange. The ACE selects the project to submit by checking the box on the left. It is recommended the ACE select Supplemental Information Report at this time otherwise this information cannot be retrieved again. The ACE selects Submit Label Certificate.

The screenshot shows the 'Smart Synchronization Client - Upload' window. The interface includes a navigation menu on the right with categories like 'Projects', 'Products', 'Frame Assemblies', etc. The main area has status indicators for 'New - Cannot Submit', 'Updated - Cannot Submit', and 'Available To Submit'. There are radio buttons for 'Upload' and 'Submit Label Certificate', with the latter being selected. A 'Get List' button is also present. Below this, there are tabs for 'All Users', 'My Company', and 'Mine', with 'Mine' selected. A 'Submit' button is visible. A modal dialog box is open in the center, displaying the message: 'Your project Label Certificates were successfully submitted' with an 'OK' button. In the background, a table shows project details:

ID	Name	Creation Date	Status
<input checked="" type="checkbox"/> PJ-MKW-5692	Tutorial 3	3/8/2016 11:23:33 PM	Design

The project has been submitted for label certificate. At this time, the project is either certified (and label certificate has been generated) or under review (waiting for an IA to review).
