

National Fenestration Rating Council Bulletin

www.nfrc.org

August 9, 2013

PROCEDURES: NFRC 700 – Product Labeling; Technical Interpretations

SUBJECT: Labeling of Composite Products in a Common Frame

This bulletin relates to the labeling of composite products in a common frame within the NFRC Product Certification Program. If you have any questions concerning the information in this bulletin, please contact [Scott Hanlon](#) at 240-821-9519.

Labeling Composite Products in a Common Frame

The NFRC Board of Directors approved the Technical Interpretations Policy Committee (TIPC) recently published [Technical Interpretation \(TI-2013-04\)](#) regarding the rating of composite products in a common frame.

The NFRC Executive Committee approved that composite products (multiple types within a common frame) can be labeled in a manner that is consistent with TI-2013-04 until language is included in technical and rating documents.

This bulletin and [TI-2013-04](#) does not exclude licensees from applying a single label on each of the product types within the composite product.

The NFRC Executive Committee also directed the Ratings and Technical Committees to review the necessary documents and consider language that is consistent with TI-2013-04 to rate and label composite products. This topic will be discussed when the committees convene at the [NFRC Fall Membership Meeting](#) in Tempe, Arizona on September 23-25, 2013.

Examples of composite products:

- Double Hung / Fixed / Double Hung in one common frame
- Awning with a Fixed lite above, separated by an integral mullion, in one common frame
- Single side-hinged door leaf with a side-lite separated by an integral mullion in a common frame.

This bulletin can be downloaded from the [Bulletin page](#) on the NFRC website.

NFRC is the recognized leader in energy performance rating and certification programs for fenestration products. Visit *NFRC News Now* for the latest fenestration-related information.
