GLOBAL GREENTAG AMERICAS WELCOMES DANIEL HUARD AS NEW CEO

NFRC ANNOUNCES NEW LEADERSHIP ROLE FOR BOARD MEMBER

GREENBELT, Md., Jan. 17, 2019 – The National Fenestration Ratings Council (NFRC) congratulates board member Daniel Huard on being named CEO at Global GreenTag Americas. Huard will lead the globally recognized eco-labeling and green product certification company to directly support the recognition of manufacturer organizations design and manufacturing of sustainable products by various global green building and wellness building certification providers.

Huard brings more than 20 years of experience and extraordinary accomplishments in the sustainability market. Known as the “Godfather of Sustainability,” Huard is one of 283 LEED Fellows and a WELL Faculty member of the International Well Building Institute. As an active NFRC board member, Huard said “This new role is an opportunity to highlight the health, comfort and sustainability benefits of GreenTag program participants to its stakeholders and end users much like NFRC is doing with Fenestration. This new certification option will help many NFRC members promote their supply chain and sustainability initiatives, wellness and have their products recognized for their positive health effects.”

“We celebrate Daniel’s appointment and look forward to seeing his contributions leading Global GreenTag,” said Deb Callahan, CEO of NFRC. “We are excited to see how Daniel will contribute to the sustainable buildings conversations and we look forward to working with him in this new capacity.”

NFRC will continue to highlight members to acknowledge their achievements that align with NFRC’s mission for continuous improvement in energy ratings performance.

ABOUT NATIONAL RATING FENESTRATION COUNCIL
NFRC is a nonprofit organization that administers a voluntary, uniform rating, labeling, and certification system for the energy performance of windows, doors, curtain walls, skylights, and
other fenestration products. Its members include manufacturers, suppliers, utilities, consumer
groups, representatives from the building and code industries, scientific and educational
organizations, and government agencies.
