NFRC BOLSTERS BOARD OF DIRECTORS WITH NEW ADDITIONS

Greenbelt, Md., Dec. 4, 2018 – The National Fenestration Rating Council (NFRC), the organization that provides fair, accurate and credible energy performance ratings for windows, doors, and skylights, announced two newly elected members and two incumbents to the 2019 Board of Directors.

The NFRC Board provides the direction, vision and strategic planning for NFRC; and assures that programs and policies are in place to meet their mission. Stemming from the annual meeting in Albuquerque, New Mexico, the Board will steward NFRC to meet their new mission and vision for 2019 of advancing continuous improvements of windows, doors, and skylights, contributing to making buildings more comfortable and energy efficient.

“As we celebrate NFRC’s 30th anniversary as the leading rating organization for windows, doors and skylights, we welcome this group of hard-working innovators to our board of directors,” said CEO Deb Callahan. “These new and returning members help position NFRC to be front and center of the evolving fenestration industry.”

The newly seated Board of Directors include:

Newly-Elected

- **John Gordon, NCTL** – John has been involved with NFRC for four years, during which he participated as the CPD Task Group chair, multiple work and task groups. He is a certified simulator and has a background in information technology.

- **Ravi Srinivasan, University of Florida** – Ravi serves on the ANS Standards Committee, NFRC’s Board of Directors and is a tenured Associate Professor of Low/Net Zero energy buildings at the M.E. Rinker School of Construction Management at the University of Florida. He has a Ph.D. in Architecture (Building Technology) and a MS in Civil
Engineering. He’s contributed to more than 75 technical articles in building energy and environmental sustainability.

Returning Directors

- **Daniel Huard, Home Building Solutions, USGBC** – In addition to NFRC’s board, Daniel chairs the Governance Committee. He is a LEED Fellow, WELL AP, a member of the Department of Energy Building Envelope team, chairman of the LEED Water Efficiency Technical Advisory Group, and a member of the LEED Technical Committee.

- **Greg McKenna, Kawneer** – Greg has more than three decades of experience in the fenestration and commercial building products industry. He has seven patents that directly relate to thermal efficiency and daylighting improvements for products used in the building envelope. He is a professional engineer and a certified Fenestration Master.

The new directors will take office on January 1, 2019. For a current list of the board of directors, please click here.

About National Rating Fenestration Council

NFRC is a nonprofit organization that administers a voluntary, uniform rating, labeling, and certification system for the energy performance of windows, doors, curtain walls, skylights, and other fenestration products. Its members include manufacturers, suppliers, utilities, consumer groups, representatives from the building and code industries, scientific and educational organizations, and government agencies.
