NFRC Recognizes Two Members for Commitment, Outstanding Service to Organization

Recipients have gone above and beyond to exemplify the mission, vision

GREENBELT, M.D., October 12, 2018 – The National Fenestration Rating Council (NFRC), the organization that provides fair, accurate, and credible energy performance ratings for windows, doors, and skylights, recognized two members for their dedication to the organization and the fenestration industry at its fall 2018 membership meeting in Albuquerque, N.M.

NFRC is focused on making buildings more energy efficient and was created to bring uniformity to the fenestration industry, implementing ratings to distinguish the spectrum of energy efficiency.

Mason Fritz, who received the Emerging Leader Award, was recognized for his promise in becoming more involved and taking on leadership roles within the organization. Dennis Anderson, Member of the Year, was honored for his commitment and dedication to NFRC’s mission and support of NFRC’s status as a public service corporation, putting the best interests of the general public at the forefront. Additionally, both honorees are active volunteers and participants in NFRC meetings and groups, helping lead the discussion among its membership.

Fritz, who has been attending meetings since 2015, has become an important part of NFRC. A few of his achievements include leading a Technical Task Group, spearheading events and trainings and participating in the Condensation Resistant Work Group to provide research and recommendations for the new rating.

“Mason is always willing to speak up at meetings, even if it’s not in agreement with the majority,” said Deb Callahan, CEO of the NFRC. “He consistently shows enthusiasm for affecting change and taking on new leadership roles with NFRC. We look forward to his leadership now and for years to come.”

Member of the Year recipient Anderson has been working with NFRC for the past 24 years and has worked for multiple test facilities in and around Minneapolis doing thermal and acoustic testing. During the last year, Anderson provided leadership and support for an array of projects and initiatives including the new Condensation Index Rating. He leads the Condensation Rating Task group as well as two groups that are working to develop the rating to be used for industry stakeholders.

“Dennis reaches out to all parties to gather feedback and answer questions. The dedication and approach he has taken with these projects are what make him stand out as our 2018 Dariush Arasteh Memorial Member of the Year,” Callahan said. “His constant support and work for NFRC is unsurpassed and we’re thankful for his commitment to the NFRC mission and vision.”
We are eager to welcome multiple new members who have brought even more innovation and achievements within the NFRC Membership Program, and these award recipients set the example for our newest members,” said board chairperson Paul Bush.

**About National Rating Fenestration Council**
NFRC is a nonprofit organization that administers a voluntary, uniform rating, labeling, and certification system for the energy performance of windows, doors, curtain walls, skylights, and other fenestration products. Its members include manufacturers, suppliers, utilities, consumer groups, representatives from the building and code industries, scientific and educational organizations, and government agencies.
