The Podcasts that have replaced the radio hour have been a hit. There have been 20 episodes to date and more on the way. More material for the Podcasts and for Instagram is needed so please don’t be shy about submitting material for social media.

The New brochures that were put out by NCEES look great and are free for the asking. If you would like to have some for your office or conference, please contact Trish and she will get them to you. If you would like to view the brochure it is on the NSPS website. Also if you have any photos that show the professional side of surveying instead of the technical side we would love to see them and use them in future brochures – it is very hard to get a good picture of the professional side of surveying. Maybe testifying as an expert witness?

It was discussed that it would be great to have videos from different states of a day in the life of a surveyor. Many people now have web cams or Go Pro Cameras that could be on while they are working. The videos could be posted on Instagram or in Basecamp. Maybe each state could have a contest in their society and then send the winner to NSPS. Also, these short videos could be shared with guidance counselors to help get young people interested in surveying.

Trish also noted that some state executives are posting their Society Publications on the executive page in Basecamp. This is a great way of sharing information from state to state and at the National Level.

Stay Safe!!
