

OCTOBER 16-18, 2014
THE SENTINEL HOTEL, PORTLAND, OR

SESSION DETAILS

Session #: 217

Title: Understanding and treating Insulin Resistance

Speaker: Zachary McCall, PharmD, MBA, BCPS, BCACP & Larissa Ienna, FNP-BC

Date: Friday, October 17

Time: 3:45-5:00 p.m.

CE Contact Hours: 1.25

Pharmacology Hours: 0.4

SESSION DESCRIPTION

Definition and features of insulin resistance and the clinical impact on patient outcomes. Different modalities for treatment will be discussed including: no-medication and pharmacotherapeutic options. How to apply these concepts through case studies and presentation

LEARNING OBJECTIVES

Upon completion of this session, the learner will be able to:

1. Discuss diagnosis, significance and non-medication management of insulin resistance.
2. Identify medications that have demonstrated usefulness in management of insulin resistance.
3. Discuss treatment options in patient case discussions.

DISCLOSURES

Conflict of Interest for Planners & Presenter:

- The planners of this CNE activity declare no conflicts of interest in the development and implementation of this educational activity.
- This presenter declares no conflict of interest. As faculty/presenter for this activity, presenter attests that they will provide the best available evidence for this content and present information fairly and without bias.
