Session #: 106
Title: Treating Your Transgender Patients with Hormones: What You Need to Know
Speaker: Allison Fox, FNP-BC
Date: Thursday, October 8
Time: 11:10 a.m. - 12:25 p.m.
CE Contact Hours: 1.25
Pharmacology Hours: 0.5

Session Description

Transgender patients often face obstacles in receiving health care. Because of this, it's important to learn the skills necessary to prescribe this vulnerable population their needed hormones. This workshop will provide you with the foundation needed to prescribe hormones, to provide follow up care including labs and preventive tests. This is an exciting time for transgender and gender non conforming patients with many changes in health care coverage. From attending this workshop, attendees will have a solid foundation in place to help them meet their transgender patients' needs.

Learning Objectives

Upon completion of this session, the learner will be able to:

1. Describe appropriate terminology for trans care.
2. Identify pathophysiology involved in prescribing hormones.
3. Describe appropriate follow-up care for your patients.
4. Identify common mistakes involved in prescribing.

Disclosures

Conflict of Interest for Presenter:

- The presenter(s) of this session declare no conflict of interest. As faculty/presenter for this activity, presenter attests that they will provide the best available evidence for this content and present information fairly and without bias.
