Session Details

Session #: 202
Title: Taking The Fear Out of Abnormal CBC’s
Speaker: Joanne Eddington, MN, FNP, AOCN
Date: Friday, October 14
Time: 10:00-11:15am
CE Contact Hours: 1.25
Pharm Hours: 0

Session Description

This workshop will review common blood count abnormalities, categorize the fundamental types of problems causing specific blood count abnormalities and review initial testing recommendations and interventions. Case studies and CBC interpretation will be utilized as part of the discussion and presentation.

Learning Objectives

Upon completion of this session, the learner will be able to:

1. Describe common platelet, red cell and white cell abnormalities.
2. Identify the 3 main causes for blood cell abnormalities.
3. Identify initial test for evaluation of blood count abnormalities.
4. Discuss the differences in the laboratory findings between Iron Deficiency Anemia, Anemia of Chronic Disease and Thalassemia.

Disclosures

Conflict of Interest for Presenter:

- The presenter(s) of this session declare no conflict of interest. As faculty/presenter for this activity, presenter attests that they will provide the best available evidence for this content and present information fairly and without bias.
