Session Details

Session #: 205  
Title: From Waah to Aaah: An Evidence-Based Update of the Well-Child Check  
Speaker: Madeleine Sanford, FNP  
Date: Friday, October 14  
Time: 10:00-11:15am  
CE Contact Hours: 1.25  
Pharm Hours: 0.33

Session Description

This presentation reviews the evidence and controversy for updated screening recommendations for well-child checks, including lead/anemia screening, developmental and autism screening, adolescent depression and substance abuse screening, and obesity and dyslipidemia screening.

Learning Objectives

Upon completion of this session, the learner will be able to:  
1. Summarize the epidemiology, risk factors and impact of iron-deficiency anemia and elevated lead levels in young children, then describe screening methods and interventions.  
2. Discuss the epidemiology, risk factors and impact of developmental delays and autism, then demonstrate appropriate screening and follow-up.  
3. Describe the risk factors for pediatric dental disease, describe oral health screening techniques, and demonstrate in-office fluoride application.  
4. Explain the epidemiology and risk factors for adolescent depression and substance abuse, demonstrate use of screening tools, and discuss appropriate follow-up.  
5. Identify the epidemiology and risk factors for pediatric obesity and dyslipidemia, and discuss controversies in screening and intervention

Disclosures

Conflict of Interest for Presenter:  
- The presenter(s) of this session declare no conflict of interest. As faculty/presenter for this activity, presenter attests that they will provide the best available evidence for this content and present information fairly and without bias.
