

## Session Details

Session # 202

Title: Pediatric Hand Injuries

Speaker: Krister Freese, MD

Date: 10/6/2017

Time: 10 AM

CE Contact Hours: 1.25

Pharm Hours: 0

## Session Description

The session will cover common and problematic injuries to the child's hand and upper extremity. There will be a specific focus on identifying injuries that can lead to long term functional problems and those that are often missed. The session will also cover the treatment options for these injuries ranging from non-operative management to surgical intervention. Lastly, the diagnosis and treatment of common infections that affect the hand will be discussed.

## Learning Objectives

Upon completion of this session, the learner will be able to:

1. Identify common pediatric hand injuries.
2. Identify hand injuries that are commonly missed.
3. Identify common hand infections and treatment options.

## Disclosures

Conflict of Interest for Presenter:

- The presenter(s) of this session declare no conflict of interest. As faculty/presenter for this activity, presenter attests that they will provide the best available evidence for this content and present information fairly and without bias.
